Dear Prof. Kangka Chakravarty,

Greetings from Internshala!

During these uncertain times in the job market, having industry experience gives students a competitive edge during placements. We believe, doing short-term virtual internships can help students learn practical skills and gain the required industry experience.

As many colleges may find it difficult to provide this industry exposure to their students, we have launched **short-term virtual internships** for all the students of Nalbari Polytechnic where they can now apply for virtual internships having a duration of 2 weeks or less and level-up their resumes.

How can your students apply for an internship?

1. Visit the application link here - internshala.com/i/STIB-CR5131. **The last date to apply is 9th January**
2. Choose internships based on interest and matching skillsets
3. Apply for those internships by answering two/three questions asked by the employer

Based on the application submitted, companies would shortlist the students and reach out to them for further process.

A few key highlights are -

- Find internships in all major categories including engineering, management, arts, media, design, and more
- Get an assured stipend and internship certificate

Eligibility - All the students (first year to final year) from any branch/stream are eligible to apply.

Kindly share this email and [notice](#) with your relevant students and have it circulated among all the college faculties, and student coordinators to ensure maximum participation.

Many thanks,
Ashutosh Lokhande
Manager - University Relations
