1. Course title: Computer Application & Programming

SCTE,ASSAM | NOVEMBER'2018

- 2: Course Code -Co-301
- 3: Semester- 3rd

4: Aim of the Course :

- To give basic concepts related to organization of a computer
- To give fundamental terminologies in networking
- To develop simple programs in C.

5: Course Outcome:

On completion of the course students will be able to:

- Explain the basics of a computer hardware and software
- Solve problems related to number systems
- Define basics of Operating System
- Familiarize with networking components
- Write simple C programs
- **6:** Prerequisites for the Course: Have basic idea about a computer and its functions.

7: Teaching Scheme (in hours):

Teaching Scheme									
L	T	P	Total hours per						
			week						
3	0	3	6						

8: ExaminationScheme:

	Theory	Sessional (TS)	Practical	Practical Sessional
	(T)		(P)	(PS)
Full Marks	70	30	25	25
Pass Marks	33	3		17

9: Detailed Course Content:

Unit	Topic/Sub-Topics	Inte	ended Learning Outcome	Hours
1	Computer Architecture:	1.	Define a computer and identify its	8
	Brief history, Charles Babbage Machine, Von		parts.	
	Neumann Architecture, block diagram, memory	2.	Define computer memory &	
	⁢'s different types, I/O devices, Role of O.S.,		describe its different types.	
	computer languages, translator software, editor.	3.	Define computer languages &	
	Data, different types of data, information and its		translators.	
	characteristics	4.	Describe the characteristics of	
			information.	
2	Number System and codes:			8
	Different number system- decimal, binary,	5.	Define decimal, binary, octal &	
	octal, hexadecimal number system, their		hexadecimal number systems.	
	conversion, 1's and 2's Complement,	6.	Convert between different number	
	subtraction using complements. Different		systems.	
	codes- ASCII, BCD, Ex-3, Gray. Conversion	7.	Define 1's & 2's complements.	
	from Gray to binary and vice-versa, BCD	8.	Subtract using 1's & 2's	
	addition.		complements.	
		9.	Describe some different codes.	

Unit	Topic/Sub-Topics	Intended Learning Outcome	Hours
3	Introduction to Operating System:		5
	Definition, single user and multi-user OS,	10. Define operating system.	
	different function performs by OS, various	11. Operate different commands of	
	popular OS like DOS, Windows,	DOS, Windows & UNIX/LINUX.	
	UNIX/LINUX. DOS and UNIX commands.		
4	Computer Network and the Internet:		6
	Definition, necessity of network, different types	12. Define network.	
	of network-LAN, MAN, WAN, network	13. Describe different types of	
	topology, transmission media, different network	network.	
	devices like NIC, hub, bridge, switch, gateway.	14. Define network topology.	
	Introduction to the internet, Internet services,	15. Describe different network	
	browser, search engine.	devices.	
		16. Define internet & describe	
		different internet services.	
		17. Explain use of different browsers	
		& search engines.	
5	Introduction to C programming:		15
	Fundamentals of programming-Algorithm &	18. Write algorithm and flow charts	
	Flowchart, source code and object code,, Basic	for simple programs	
	structure of C programs, Executing a C	19. Define basic terminology of C	
	program, Constants, Variables, and data types.	language.	
	Operators and expression, Input Output function	20. Write small programusing C	
	like printf, scanf, getchar, putchar, gets, puts,	language.	
	Decision making and branching using IFElse,	21. Write diversified solutions using	
	Switch, looping using for, while, and do-while,	C language.	
	array.	22. Differentiate between IFElse and	
		Switch statement.	
	Internal Assessment		3

10: Distribution of Marks:

Unit	Topic		Type of Questi	ion	Total
		Objective	Short	Descriptive	Marks
1	Computer Architecture	6	5	5	16

K = Knowledge C = Comprehension A = Application HA = Higher Than Application T = Total

10. Intellectual Skills:

- Logical reasoning
- Relating programming concepts in problem solving

11. Motor Skills:

• Learn to use and handle a computer and its peripherals.

List of Lab Exercises:

I. Basic commands for computer system maintenance.

II. Preparation of Documents

Introduction to Word processing, Opening a document, preparing documents, inserting diagrams and tables, Editing document- (a) Character, word and line editing, (b) Margin Setting, Paragraph alignment, (c) Block Operations, (d) Spell Checker, (e) Saving a document, (f) Mailmerge.

III. Information Presentation through Spread Sheet

Application of Spread Sheet, Structure of spreadsheets, preparing table for simple data and numeric operations, using formulae and functions in excel operations, Creation of graphs, Pie charts, bar charts.

IV. Preparation of presentation

Creation of electronic slides on any topic, Practice of animation effect, presentation of slides.

V. Programming in C

Editing a C program, defining variables and assigning values to variables Arithmetic and relational operators, arithmetic expressions and their evaluation Practice on in iput/output function like getchar, putchar, gets, puts, scanf, printf etc. Programming exercise on simple if statement, If.else statement, switch statement Programming exercise on looping with do-while, while, for loop and array.

1. Course Title: ENGINEERING ECONOMICS AND ACCOUNTANCY

2. Course Code: Hu - 302

3. Semester: 3rd

4. Aim of the Course:

- 1. To introduce the students to some important economic and accounting terms.
- 2. To acquaint the students with some economic laws and with the functions of money, bank etc.
- 3. To make the students capable of recording business transaction under double entry system.
- 4. To introduce the students about financial statements.

5. Course Outcomes:

On completion of the course on EEA, students will be able to

- \triangleright CO₁ = Define some important economic and accounting terms.
- \triangleright CO₂ = explain some basic economic laws.
- > CO₃ = Describe overall economic environment.
- \triangleright CO₄ = explain double entry system of book keeping.
- > CO₅ = record business transactions under double entry system of book keeping
- \triangleright CO ₆ = define financial statements.

1. Course Title: Elements of Electrical Engineering

2. Course Code: El - 304

3. Semester: 3rd

4. Rationale of the Subject:

Technology integration is the main characteristic of present engineering development. Now a day, it is necessary to possess basic knowledge of various engineering discipline. The main objective of this subject is to enhance the knowledge and skill level in inter disciplinary area. This course is designed to impart basic knowledge of Electrical Engineering to the students of other disciplines like Civil, Mechanical etc.

5. Aim:

- 1. To impart basic knowledge of electrical engineering and preliminary idea of DC machine and transformer to the student of branches other than electrical.
 - 2. To enhance the knowledge and skill level of electrical engineering in interdisciplinary area.

6. Objective:

The student will be able to

- 1. Know circuits with series and parallel resistances, power, energy.
- 2. Know AC wave form and its various quantities.
- 3. Interpret the response of R, L, C to AC supply.
- 4. Know calculation of various parameters of AC series circuit.
- 5. Know construction, working principle and use of DC machine, transformer.

6(a) COURSE OUTCOMES:-

On successful completion of the course the student will be able to -

- CO 1: Define conductor, insulator, current, voltage. Understand Ohm's law, work, power, energy and solve numerical problem.
- CO 2: Explain construction, working principle, application, starting and operation of DC generator and motor.
- CO 3: Develop emf equation of single phase ac system, analyze R, L, C, R-L, R-C and R-L-C circuit and know the use of j operator.
- CO 4: Understand the construction and working principle of transformer.
- CO 5: Know construction, working principle and starting of induction motor.

7. Pre-Requisite:

- 1. Resistance, inductance, capacitance.
- 2. Simple differential calculus & integral calculus, matrix.
- 8. Teaching Scheme (in hours per week):

Lecture	Tutorial	Practical	Total
3hrs	1hrs	3hrs	7hrs/week

9. Examination Scheme:

Theory			Pass	Prac	tical	Pass	Total	Credit
	Theory		marks			marks(marks

70	10	20						

10. Detailed Course Content:

Chapter	Chapter Title	Content	Duration
No			(in hours)
1.0	Introduction	1.1 Conductor and Insulator Type, Properties and Uses	
		1.2 Definitions – Current, Voltage, Resistance	1
2.0	Work, Power,	2.1 Work, Power, Energy – definitions and units, relations,	
	Energy and DC	simple problems	
	Circuit	2.2 Resistance and resistivity, Conductance and conductivity,	
		Factors on which resistance depends, Effect of temperature on	
		resistance	
		2.3 Ohm's law, resistance in series, Voltage division rule,	
		Resistance in parallel, Current division rule, Simple problems	
		2.4 Network terminology – Circuit, parameter, Linear circuit,	
		Non-linear circuit, Bilateral circuit, Unilateral circuit, Electric	9
		network, Active and passive element, Active and passive	
		network, Node, Junction, Branch, Loop, Mesh.	
		2.5 Kirchhoff's point law, Voltage law and problems	
3.0	D. C. Generator	3.1 Faraday's laws of electromagnetic induction	
		3.2 Fleming's right hand rule	5
		3.2 Principle of D. C. Generator, Construction, types, Emf	
		equation, Uses and simple problems	

PRINTING TECHNOLOGY (NEW SYLLABUS), 3rd to 6th SEMESTER

4.0	D. C. Motor	4.1 Lenz's law	
		4.2 Fleming's left hand rule	5
		4.2 Principle of D. C. motor, Construction, types, Back Emf, Uses	
		and simple problems	
5.0	A.C. Fundamentals	5.1 Definitions, Equations, Cycle, Time period, Frequency,	
		Amplitude, Phase, Phase difference, RMS value, Average value,	3
		Maximum values, form factor, Crest factor, Simple problem	
6.0	A.C. Series Circuit	6.1 Definitions – Inductance, Inductive reactance, Capacitance,	
		Capacitive reactance, impedance	
		6.2 A. C. through pure resistance, pure inductance and pure	
		capacitance	
		6.3 A. C. through R—L, R—C and R—L – C seriescircuit and	8
		their problems	
		6.4 Resonance and problems	
7.0	Phasor Algebra	7.1 J operator	2
		7.2 Rectangular, polar and trigonometrical form of phasor.	
		7.3 Addition, subtraction, multiplication and division of phasor	

8.0	Transformer	8.1 Working principle, Construction, types, Emf equation,			
		Transformation ratio, Ideal transformer, their problems			
		8.2 Losses of transformer, Rating of transformer	5		
		8.3 C. T. and P.T., Auto transformer,			
9.0	Induction Motor	9.1 3 phase induction motor – Principle, Construction, Uses,			
		Synchronous speed, full load speed, Slip, Percentage of speed	4		
CLASS TEST

9	Induction motor	1			1								2		2

13. Suggested Implementation Strategies:

This is a fundamental subject. It is necessary to handle the subject carefully so that students can develop clear understanding of principles and concepts and develop skill in their application in solving related problems. Teacher may give emphasis on laboratory experiments and give lot of home assignments.

14. Suggested Learning Resources:

Book List: 1.Fundamentals of Electrical Engineering by Tarlok Singh, S. K. Kataria& Sons,

- 2. Electrical Technology Vol.-I & Vol.-II by B. L. Thereja & A. K. Thereja, S. Chand & Co.
- 3. Basic Electrical Engineering by V. K. Mehta & Rohit Mehta, S. Chand & Co.
 - 4. Fundamentals of Electrical & Electronics Engineering by S. Ghosh, PHI
- 5. Electrical Technology Vol.-I by J. B. Gupta, S. K. Kataria& Sons

Course Title :- Element of Electrical Engineering (Practical)

3rd Semester

CODE No. El - 304P

Practical: Full Marks: 50, Test/viva =25 Sessional (TA+HA) Marks: 25,

Pass Marks: 17/50

Skills to be developed

a)Intellectual Skills:-

- 1. Skill of analyzing results.
- 2. Skill of identification of instruments.
- b) Motor Skill:-
- 1. Skill of connecting the instruments/machines properly.
- 2. Skill of taking the reading of the instrument properly.
- 3. Skill of drawing phasor diagram and graph.

List of Practical

- 1. To find the following for a filament lamp
 - a) Variation of resistance with voltage
 - b) Variation of power with voltage
- 2. Verification of Ohm's law.
- 3. Verification of Kirchhoff's laws.
- 4. Testing of fuse and find out the fusing constant.
- 5. To find out the voltage-current relationship in an R-L series AC circuit to determine power factor of the circuit.
- 6. To find out the voltage-current relationship in an R-C series AC circuit to determine power factor of the circuit.
- 7. To find out the voltage-current relationship in an R-L-C series AC circuit to determine power factor of the circuit.
- 8. Study of two point starter and DC series motor & starting of DC series motor.
- 9. Study of three point starter and DC shunt motor & starting of DC shunt motor.
- 10. Find the transformation ratio of single phase transformer.

Reference Book:

Lab manual on basic Electrical Engineering and Electrical MeasurementBy S K Bhattacharjee, K M Rastogy

Lab Course in Electrical Engineering by S G Tarnekar, P K Kharbandha

A Text Book of Practical in Electrical Engineering by Dr. N. K. Jain

1. COURSE TITLE: ELEMENTS OF ELECTTRONICS ENGINEERING

2. COURSE CODE: ET-304

3. Semester: 3rd Semester

4. Contact hours: 45

5. Rationale: The Aim of the course is to develop the student to excel in over all skill, ability, innovation and team work. The course also aims to involve students in challenging meaningful activities by proving a strong base in electronics thereby they will be able to understand concepts and processes of electronic parts used in automobile engineering.

6. Objectives:

After the completion of the course the students will be able to

- Demonstrate the functioning of electronic components and devices (resistors capacitors inductors valves diodes transistors)
- Fabricate basic rectifiers and amplifier circuits.
- Develop the skill to handle sophisticated electronic instruments (CRO, DMM)
- Simplify and design digital logic circuits.
- Understand introduces appraisal use of microprocessor in Automobile engineering field.

7. Teaching Scheme:

Lecture	Tutorial	Practical	Total
3	-	3	6

8. Examination Scheme:

Theory					Practical					
Exam	ination	Sessional		Sessional Practical Viva		Sessional				
Full	Pass	Full	Pass	Full	Pass	Full	Pass			
Marks	Marks	Marks	Marks	Marks	Marks	Marks	Marks			
70	28	30	15	25	12	25	13	150		

9. Details of Contents:

Chapter	Content /area of focus	Duration
No.		(In Hours)
1.0	INTRODUCTION:	5
	1.1 Introduction to Electronics: Its scope.	
	1.2 Electronic Components- Active and Passive Components.	
	1.3 Passive Components- Resistors, Inductor, Capacitors, Colour Coding.	

2.0	VALVES:	7
	2.1 Types of electron emission, vacuum diode- physical construction onward and reversed biasing, characteristics, space charge.	
	2.2 Vacuum Triode- Physical Construction, characteristics, and parameters: Triode as an amplifier.	
	2.3 Triode & Pentode- limitations of Triode and hence	
	realization of Triode and pentode.	
3.0	SEMICONDUCTOR	9
	3.1 Review of atomic theory, electron pair, bonds, energy, levels conduction band, and valance band, difference between insulation, conduction and semiconductors: impurities, intrinsic and extrinsic semiconductors, P- type and N- type semiconductors.	
	3.2 Semiconductors Diode P-N junction, forward and reverse biased diode, characteristics curve, half wave and full wave rectification circuits	
	3.3 Transistors- Physical construction of P-N-P & N-P-N transistors, their biasing, circuit configurations (CB, CE & CC), their input and output characteristics.	
4.0	TRANSISTOR AMPLIFIER	6
	4.1 Transistor as amplifier- principles of transistor as an amplifier: Different classes of amplifier- class A, B, C and Class AB amplifier, push pull amplifier.	
	4.2 Multistage amplifier- Need for multistage amplification: different coupling methods- DC, RC & transformer coupling, their merits, demerits and applications.	
5.0	Oscillators	5
	5.1 Types of feedback- positive and negative feedback and their comparison	
	5.2 Oscillators- condition for oscillations: types of oscillators	
	(using transistors only) – Hartley, Colpitt's, Clapp's, crystal etc, their advantages disadvantages and application.	
6.0	Electronic instruments	5
	6.1 Cathode Ray oscilloscope- basic idea, construction, working & uses	
	6.2 Multimeter –working & uses	
7.0	Digital electronics	2
	7.1 Boolean algebra and logic gates; AND, OR, NOT, NAND, NOR, XOR operation	

8.0	Microprocessor:	3
	8.1 Basics of 8085 microprocessor, pin diagram and architecture, application and use of microprocessor chip in automobiles.	
9.0	Class Test	3

10. Distribution of Marks:

Ch.	Chapter Title	Hours		Marks			
No			Objective Types (Compulsory)	Descriptive Type	Short Questions		
1	Introduction	5	1	2	2	05	
2	Valve	7	2	7	3	12	
3	semiconductors	9	2	10	3	15	
4	Transistor amplifier	6	2	7	3	12	
5	Oscillators	5	1	7	2	10	
6	Electronic instruments	5	1	5	2	08	
7	Digital electronics	2	-	3	-	03	
8	Microprocessor	3	1	4	-	05	
11	Class Test	3	-	-	-	-	
	Total	45	10	45	15	70	

5.Course Title— Elements of Electronic Engineering Laboratory ELEMENTS OF ELECTRONICS ENGINEERING- LAB

CODE No. ET-304P

Practical: Full Marks: 25, Pass Marks: 12 Sessional: Full Marks: 25, Pass Marks: 13

Skills to be developed

Intellectual Skills:- a. Skill of analyzing results.

b. Skill of identification of instruments.

Motor Skill:- a. Skill of connecting the instruments/machines properly.

- **b.** Skill of taking the reading of the instrument properly.
- c. Skill of drawing phasor diagram and graph.

List of Practical: 1. To find the following for a filament lamp

- a. Variation of resistance with voltage
- **b.** Variation of power with voltage
- 2. Verification of Ohm's law.
- 3. Verification of Kirchhoff's laws.
- **4.** Testing of fuse and find out the fusing constant.
- 5. To find out the voltage-current relationship in an R-L series AC circuit to determine power factor of the circuit.
- 6. To find out the voltage-current relationship in an R-C series AC circuit to determine power factor of the circuit.
- 7. To find out the voltage-current relationship in an R-L-C series AC circuit to determine power factor of the circuit.
- **8.** Study of two point starter and DC series motor & starting of DC series motor.
- 9. Study of three point starter and DC shunt motor & starting of DC shunt motor.
- 10. Open circuit and short circuit test of a single phase transformer.
- 11. Polarity test of a single phase transformer.
- 12. Parallel operation of single phase transformer.

PRINTING TECHNOLOGY (NEW SYLLABUS), 3rd to 6th SEMESTER

By S K Bhattacharjee, K M Rastogy

- ii. Lab Course in Electrical Engineering by S G Tarnekar, P K Kharbandha
- iii. A Text Book of Practical in Electrical Engineering by Dr. N. K. Jain

1. Course Title : PRINTING PROCESS

Course Code : Pt – 301
 Semester : 3rd Semester

4. **Aim** : The aim of teaching the paper life basic printing is to acquaint the student with various methods of processing and printing use in industry and to equip the students with the basic principle of technological changes taking place in different aspect connected to printing and graphic Arts field.

Objective: The students will be able to Understand different principles of printing, processing techniques & graphic Arts technology.

Pre-Requisite: Elementary knowledge of Basic Printing & Production

Course Outcomes (CO's)						
CO-1	Knowledge of history and evolution of printing, understand different processes of printing, understand different processes.					
CO-2		Understand the basic principles of different printing processes, knowledge of advantages and limitations of different printing processes.				
CO-3		lassification of Offset printing machines, configuration of sheetfed offset dge of different type of colour sheetfeds, classification of web offset				
CO-4	Understand the configuration of flexography machine, knowledge of different types of flexography machine.					
CO-5	_	erent types of Gravure and Screen printing machines, understanding of screen printing machines.				

Programme Ou	itcomes (PO's)						
PO-1	,	Apply the knowledge of mathematics and science to understand engineering fundamentals and to solve Printing Technology problems					
PO-2	Design and condu	Design and conduct experiments of Printing Technology as well as analyse and interpret data.					
PO-3	Identify, formulat	Identify, formulate and solve Printing Technology problems.					
PO-4	Use the technique	Use the techniques, skills and modern engineering tools necessary for engineering practices.					
PO-5	·	Understand professional ethics and responsibility to extend the benefit of the Printing Technology projects to the society.					
PO-6		Communicate effectively both verbally and in writing within the engineering community and with people in the society.					
PO-7 Recognize the need for, and an ability to engage in life long learning to incorporate technological innovations.							

5. Teaching Scheme (In Hrs):

Lecturer	Tutorial	Practical	Total
3		3	6

70	10	20	30	33/100	25	25	17/50	100

7. Detailed course content:

Chapter	Contents	Intended Learning Outcome (ILO)	Hours
1	Introduction to printing process 1.1 Evolution of Printing - Invention of movable wooden and metal type printing Lithography- Offset Printing-Intaglio- Gravure-Flexography- Screen Printing- Digital Printing 1.2 Structure of Printing Industry- Pre-media, Prepress - Film reproduction, Image assembly, Plate making and Digital prepress, Press and Post Press Sections- Flow chart. 1.3 Applications of Printing Process - Offset, Intaglio, Gravure, Flexography, Screen Printing and Digital printing.	 State the history and evolution of Printing Familiarise with different processes of printing industry Use the different printing process. 	10
2	Principles of Printing Processes 2.1 Basic Principles of Letterpress, Offset, Flexography, Gravure, Screen Printing and Digital Printing 2.2 Advantages and Limitations of Printing process- Letterpress, Offset, Flexography, Gravure and Screen Printing.	 Explain basic principle of printing processes Distinguish the merits and demerits of printing processes 	8
3	Classification of Offset Printing Machines 3.1 Classification of Offset Machines- Sheet fed and Web fed Offset machines, Basic configuration of sheet fed offset machine. 3.2 Single colour sheet-fed offset press, Multi colour sheet-fed press, Offset perfecting press and small offset press. 3.3 Classification of web offset Machines- In-line web offset press, Blanket- to blanket web offset press and Satellite type web offset press.	 Classify the offset machines Disguise the different types of colour sheet feds Classify the web offset machines 	7
4	Classifications of Flexography Printing 4.1 Basic configuration of flexography machine. 4.2 Types of flexography machine - In-line- type flexography press, Stack type flexography press and Satellite of flexography in Food packaging.	Know the basics configuration of flexography machine Know the different types of flexography machine	8
5	Classifications of Gravure & Screen	Classify the different types of	9

 5.1 Classification and types of Gravure machine- Gravure printing unit, printing cylinder, Doctor Blade and Impression cylinder. 5.2 Screen printing machine – parts of screen printing press 5.3 Types of screen printing machines – Flat –bed hinged frame machines, Flatbed vertical lift machines, Cylinder-bed 	Gravure Machines • Know the different parts of screen printing press • Identify the different types of screen printing press	
bed vertical lift machines, Cylinder-bed machines, Container printing machines		
and Rotary screen machines.

PRINTING PROCESS LAB Code: Pt-301

Total Marks: - 50 Practical: - 25

Pass Marks: - 8
Pass Marks: - 9

Sessional :- 25 Skills to be developed –

- a) Intellectual skills
 - i. Knowledge of basic processes related to Printing Processii. Identify & selection of various tools, equipment & software.
- b) Machine skills -
 - i. Operate, control different machines & equipment
 - ii. Inspect/ produce the job for specified dimensions
 - iii. safety practices/ Care & maintenance of the tools & machines.

List of the Experiments

Unit: 1 Practice on Offset Printing Machine

- 1. Installation of Plate and Blanket
- 2. Setting of Feeder, Impression & Delivery according to the thickness and size of the stock.
- 3. Applying ink, damping solution make ready, printing with registration

Unit: 2 Practice on Flexography & Gravuare Printing Machine

- 1. Installation of Stereo or Image Cylinder, Fitting the Web path, maintaining proper tension.
- 2. Choosing the right Anilox/ adjusting the Doctor Blade, Adjusting the ink viscosity by Flow cup
- 3. Maintaining the proper drying temperature make ready, printing with registration.

Unit: 3 Practice on Screen Printing Machine

- 1. Study of various type of screen materials
- 2. Screen stretching techniques
- 3. Screen preparation Direct
- 4. Stencil preparation Indirect, Direct/ Indirect
- 5. Screen printing of various routine documents
- 6. Printing on various substances
- 7. Screen Reclamation

- 8. 2 Colour Screen Printing
- 9. 4 Colour Screen Printing
- 10. Study of automatic Screen Printing

Reference Book

- 1. Modern lithography Ian Faux SITA Ltd.
- $2. \quad Printing\ Materials\ Science\ and\ Technology-Thompson,\ Bob-PIRA\ Publication$
- 3. The Printing Production Manual J. Peacock, C.Berrel and Barnard PIRA Publication

1. Course Title : PREPRESS REPROTECHNIQUE

Course Code : Pt – 302
 Semester : 3rd Semester

4. **Aim** : Getting the output through a printing machine is the most important operation for completing the print production. This subject known as Presswork - I is one of the key subject to make a clear and sound knowledge in some of the major print production systems and supplies. This will enable the students to make judgement about the aspect of printing, particularly the selection of a particular process to choose for a specific print production.

Objective: The students will be able to

- (i) understand the basic and clear classification of all kinds of printing processes;
- (ii) understand the details divisions and subdivisions of letterpress printing machines, their applications and uses, characteristics and identifications of their products- merits and demerits of various letterpress machines;
- (iii) understand the principal mechanism of various letterpress and sheet-fed machines, their constructional differences in the printing unit and operational features;
- (iv) understanding the various feeding and delivery mechanism in printing machines;
- (v) appreciate the relational aspects of various materials used in presswork.

Pre-Requisite: Elementary knowledge of Basic Printing & Production

Course Outcomes	s (CO's)
CO-1	Knowledge of silver/ non-silver based emulsions, chemicals and their functions, manual and automatic film production, different chemical processes, densitometer
CO-2	Understand half tone reproduction - necessity of screen, different types of halftone screen, negatives and positives, different types of scanners
CO-3	Understand the basics of light, electromagnetic sprectum, perception, properties, temperature of colour, measurement of colour- spectrophotometer, different colour synthesis
CO-4	Understand colour reproduction- basic principles, colour separation - methods, electronic separation technique, colour correction- manual and photographic.
CO-5	Understand reproduction photography, conventional camera, flat colour and process colour, gray balance, UCR & GCR
CO-6	Knowledge of proofing - photographic, electrostatic, thermal, inkjet.

Programme Ou	atcomes (PO's)
PO-1	Apply the knowledge of mathematics and science to understand engineering fundamentals and to solve Printing Technology problems
PO-2	Design and conduct experiments of Printing Technology as well as analyse and interpret data.
PO-3	Identify, formulate and solve Printing Technology problems.
PO-4	Use the techniques, skills and modern engineering tools necessary for engineering practices.
PO-5	Understand professional ethics and responsibility to extend the benefit of the Printing Technology projects to the society.
PO-6	Communicate effectively both verbally and in writing within the engineering community and with people in the society.
PO-7	Recognize the need for, and an ability to engage in life long learning to incorporate technological innovations.

7. Detailed course content:

Chapter No.	Chapter Title	Contents	Duration (in Hrs)
1	LIGHT SENSITIVE EMULSION & PROCESSING	1.1 Study of silver based photographic emulsions 1.2 Studies of non-silver based emulsion viz., Diazo, Polymer 1.3 Study of development, stop bath, fixation, chemicals and their functions. 1.4 Study of manual and automatic film processing techniques 1.5 Study of Reproduction, Intensification & Chemical Reversal Process.	6

		1.6 Study of basic densitometry, characteristic curve,	
		gamma, &	
		Densitometer.	
2	HALF-TONE	2.1 Introduction and necessity of screen in reproduction	7
	REPRODUCTION	processes.	
		2.2 Different type of halftone screens viz., Glass ruled and	
		vignette contact screen, screens for special effects	
		2.3 Study of halftone screen theories	
		2.4 Study of Moiré pattern & Rosette pattern	
		2.5 Halftone negatives & Positives.	
		2.6 Study of high light dropout, duotones, Line-tone	
		combination	
		2.7 Different types of Scanner i.e., PMT based and CCD	
		based	
2	LICHT	scanners and their functions.	7
3	LIGHT & COLOUR	3.1 Nature of light, Electromagnetic spectrum, illumination & ideal	/
	COLOUR	illuminants for Repro-photo work.	
		3.2 Perception of colour, properties of colour, colour	
		temperature.	
		3.3 Fundamental characteristics of colour, Hue, Saturation,	
		Brightness, Colour space, Measurement of colour,	
		Spectrophotometer.	
		3.4 Study of different colour synthesis viz., Additive	
		synthesis,	
		Subtractive synthesis, Colour Triangle, Complementary	
		colours, Colour printing principle.	
4	COLOUR	4.1 Basic principles of colour separation, filters & filter	6
	REPRODUCTION	factors, its	
	— SEPARATION	absorption & transmission qualities.	
	& CORRECTION	4.2 Methods of colour separation.	
		4.3 Electronic colour separation technique.	
		4.4 Necessity of colour correction, Principles of colour & tonal	
		correction.	
		4.5 Study of manual correction procedure through dye	
		retouching, staging & dot etching	
		4.6 Study of Photographic correction procedure i.e.	
		Photographic	
		Masking.	
5	REPRODUCTION	5.1 Conventional Horizontal & Vertical Process camera	8
	PHOTOGRAPHY	5.2 Flat Colour & Process Colour	
		5.3 Gray balance, UCR & GCR	
6	PROOFING	6.1 Photographic Proofing	8
		6.2 Electrostatic- Laser Proofing	
		6.3 Thermal Proofing	
		6.4 Inkjet Proofing	
7	Class test	Three test of 1hrs.	2 hrs.

PROFESSIONAL PRACTICE -I

3rd SEMESTER, PRINTING TECHNOLOGY

CODE: PT-310

THEORY SCHEME: PRACTICAL SCHEME:

Theory: 1hr/week Practical assessment: 25 marks

Practical: 2hrs/week Practical test: 25 marks

Credit: 2

A) RATIONAL:-

To develop general confidence, ability to communicate and attitude, in addition to basic technological concepts through industrial visits, guest lectures on technical topics and conducting group discussions.

B) AIMS AND OBJECTIVES:-

The student will be able to:

- Preparing report on industrial visits, expert lectures.
- Interacting with peers to share thoughts.
- Prepare notes for given topic.
- Presentation in seminar, group discussion on improvement of communication skills.
- Acquire information from different sources.

C) PRE- REQUISITE:-

- 1. Desire to gain comparable knowledge and skills of various activities in various areas of importance.
- 2. Eagerness to participate in group work and to share thoughts with group members.
- 3. Knowledge of basic electrical engineering.

Activities:

1. INDUSTRIAL/FIELD VISIT: -

- 10 HRS.

Structured field visits be arranged and report of the same should be submitted by the individual student, to form part of the team work.

PRINTING TECHNOLOGY (NEW SYLLABUS), 3rd to 6th SEMESTER

Visits to following companies:

- a. Nearby Yark Print Pvt.Ltd. at BaihataChariali and observe equipment and operating procedure
- b. Abdos India Pvt. Ltd.
- 2. GUEST LECTURES: (Any three) Lectures by professional /industrial expert/ student

Seminars on the following areas.

-10 HRS

- a. Latest method for printing
- b. Modern printing devices
- c. Modern concept for CTP plate making

Individual report of the above lecture should be submitted by the students.

- 3. GROUP DISCUSSION: (Any TWO among a group of four to five students). Topic and time duration of the group discussion to be decided by concerned teacher.

 -10 HRS.
 - a. Current topics related to Printing Technology.
 - b. Concept on graphic design
- 4. STUDENTS ACTIVITY: The students in a group of 4 to 5 will perform any one of the following activities. –10 HRS.
 - a) Identify the various printing tools and equipments and write their functions.
 - b) Tree plantation inside or outside of the institute campus.
 - c) Help in flood relief camp (by all students)
 - d) Other co- curricular and extracurricular activity.

EXAMINATION SCHEME (on Practical assessment)

Continuous internal assessment of 25 marks is to be carried out by the teachers.

Distribution of marks: -

Activities =10,

Group discussion = 5,

Field visits=5 and

Guest lecturer attendance and

Report=5.

1. Course Title : Visual Design and DTP

2. Course Code : Pt – 401
3. Semester : 4th Semester

PRINTING TECHNOLOGY (NEW SYLLABUS), 3rd to 6th SEMESTER

4. **Aim** : Graphic design is working with type, image, symbol to establish representation of ideas or products to simply communicate.

Objective: ..

To work with clients to identify business, objectives, create strategies and implement then with a range of design, advertising, branding and marketing projects.

Pre-Requisite: Elementary knowledge of Basic Printing & Production

Course Outcomes (CO	's)	
CO-1		ledge of Graphic design and its elements like line shape etc., design ples, definitions, details of layout, defination
CO-2	desce	rstand the measurements followed in typography- x height, ascender, nder etc., knowledge of different type groups- sanserif, serif, display types, bes, legibility and readability of fronts, vector fronts, bitmapped fronts etc.,
CO-3	1	rstand the fundamentles of colour dynamics and its type, spectrum, ledge of colour whell, psycological effect of colours, environment setting for r
CO-4		rstand different styles of page layout, grids, columns, templates etc., photo g, imposition scheme, different format for magazine, newspaper and work.
CO-5	proof	ledge of different processes of print publishing like dummy preparation, reading etc., design of printed products, feasibility of various printing / ng software, understanding of different drawing file formats.

Programme Outcor	mes (PO's)
PO-1	Apply the knowledge of mathematics and science to understand engineering fundamentals and to solve Printing Technology problems
PO-2	Design and conduct experiments of Printing Technology as well as analyse and interpret data.
PO-3	Identify, formulate and solve Printing Technology problems.
PO-4	Use the techniques, skills and modern engineering tools necessary for engineering practices.
PO-5	Understand professional ethics and responsibility to extend the benefit of the Printing Technology projects to the society.
PO-6	Communicate effectively both verbally and in writing within the engineering community and with people in the society.
PO-7	Recognize the need for, and an ability to engage in life long learning to incorporate technological innovations.

7. Detailed course content:

Chapter No.	Chapter Title	Contents	Duration
			(in Hrs)
1	Introduction to	1.1-Design, Introduction to graphic design-goal,	9
	Design and	audience, venue and budget.	
	Layout	1.2-Design elements- line, shape, value, format,	
		texture-visual and tactile, type, color, and space-	
		negative and positive.	
		1.3-Design principles, Balance- Symmetrical- Optical	
		Centre, Unity, Emphasis, Contrast, rhythm,	
		proportion and harmony.	
		1.4- Layout, definition, stages of layout-	
		Visualization, Thumbnails, Rough layout and	
2	T1	Comprehensive/final layout.	10
2	Typig raphy	2.1- Measurements followed in typography- point	10
		and pica. Anatomy of types- x height, Ascender and	
		descender, base line and body width. Parts of face-	
		arm, stroke,bracket, bowl, terminal, serif, hairline,	
		count, stem and spine.	
		2.2-Type groups- sanserif, serif, novelty/decorative,	
		black letter and roman old style, typeface, type front,	
		type family, type style, modern typefaces, display	
		types, true type and open type.Initial and dropped.	
		2.3- Importance of Legibility and Readability, Vector	
		fronts and bitmapped fronts, Logos and trademarks.	

3	Colour Dynamics	3.1-Fudamentls of Colour, visible spectrum, primary, secondary and tertiary colours, subtractive colour and additive colour theory, process, spot colour/pantone, tint,shade and tones. 3.2- Colour whell- purpose and diagram, monochromatic, analogue, complimentaery, split complementary and trials colors. 3.3- psychological effects of colours- warm and cool colours. 3.4- Setting the environment for Colour works- Color Temperature.	8
4	Page layout	 4.1- Style of house, style of work, grids, and columns, templates, master page, style sheet, caption, quotes, headers and footers, folio, headlings, sub headlines and margines. 4.2- Handling orginals/photo- cropping, scaling and skewing. 4.3- Imposition scheme- half sheet work, sheet work/work and turn, work and tumble and work and twist. 4.4- Layout format for Magazine, Newspaper, and Bookwork. 	8
5	Print publishing	5.1- Dummy preparation, proof reading, proof reading marks, printers mark- crop, trim, bleed slug and registration, considerations for print production. 5.2- Designing of other printed products- brochure, leaf, visiting card, invitation, booklet and folders. 5.3- Feasibility of various graphic designing and pagination software (Photoshop, Illustrator, CorelDraw, Adobe In-design, Quark Xpress or FOSS) 5.4- Understanding file formats- TIFF, JPEG, PDF, GIF, EPS and PNG	7
7	Class test	Three test of 1hrs.	3 hrs.

List of books:-

Sl.No.	Title of book	Author	Publication

Visual Design and DTP-(Lab) Code-Pt-401 (P)

Total Marks: - 50

Practical: - 25
Sessional: - 25
Pass Marks: - 8
Pass Marks: - 9

Skills to be developed -

a) Intellectual skills –

i. Knowledge of basic processes related to Visual Design and DTP ii. Identify & selection of various tools, equipment & software.

b) Operating skills --

- i. Operate, control different machines & equipment
- ii. Inspect/ produce the job for specified dimensions
- iii. safety practices/ Care & maintenance of the tools & machines.

List of the practical

- 1. Practicing the techniques of lettering by tracing of different typeface characters Study of different typefaces & family.
- 2. Layout for letterheads, visiting cards, greeting cards, invitation, certificates.
- **3.** Designing of logo, caption, monograms and trademarks enlargement & reduction geometrically.
- **4.** Study of colour and mixing of colours, two/three-colour combinations, colour circle, Complementary colour, Double-split Complementary colour, Analogous colour & its harmony.
- **5.** Layout for typographical design of book cover, title pages, half title page & book jacket, Page layout with margin.
- **6**. Tools of the layout man: Care & handling.
- 7. Layout for folders, calendars posters and advertisement.
- **8.** Study of layout and artwork. Understanding fully the concept of making printing design.
- **9.** Study of layout for designing computer stationery/continuous stationery including MICR Cheques.
- 10. Practice on scanning & computer assisted composition.
- 11. Collection and study of printed materials.

Reference books:-

- 1. Fundamentals of Copy and Layout National Textbook Company, Illinois, USA
- 2. Exploring Publication Design Poppy Evans

1. Course Title: Image Processing

Course Code: Pt – 402
 Semester: 4th Semester

4. **Aim**: To give the students a general understanding of the fundamentals of digital image processing and to introduce then to analytical tools which are currently used in digital image processing.

Objective: Understand the basic of the human visual system as they relate to image processing including spatial fiequancy resolution and brightness adaption.

Pre-Requisite: Elementary knowledge of Basic Printing & Production

Course Outcomes (CO's	5)					
CO-1	Knowledge of originals and its type and classification, understand the types of colour, properties, and the spectrum					
CO-2	CO-2 Knowledge of digital reproduction with digital camera and its basic theories, in capturing, editing and manipulation techniques.					
CO-3	Understand line reproduction, halftone reproduction, knowledge of scanners and its principles, use of scanner in halftone reproduction					
CO-4	Understand film processing, knowledge of photographic films and its structures, different film processing chemicals, computer to film technology, types of film imagesetters.					
CO-5	Understand offset plate processing, types of plates, plate making equipments, facilities, control variables for plate making, steps involved and trouble shooting.					

Programme Outco	omes (PO's)							
PO-1		ledge of mathematics and science to understand engineering nd to solve Printing Technology problems						
PO-2	Design and conduct experiments of Printing Technology as well as analyse and interpret data.							
PO-3	Identify, formula	Identify, formulate and solve Printing Technology problems.						
PO-4	Use the techniq practices.	ues, skills and modern engineering tools necessary for engineering						
PO-5	· ·	fessional ethics and responsibility to extend the benefit of the logy projects to the society.						
PO-6		ffectively both verbally and in writing within the engineering with people in the society.						
PO-7	Recognize the n technological in	eed for, and an ability to engage in life long learning to incorporate novations.						

5. Teaching Scheme (In Hrs):

Lecturer	Tutorial	Practical	Total
3		3	6

6. Examination scheme:

7. Detailed course content:

Chapter No.	Chapter Title	Contents	Duration (in Hrs)
1	Originals and Colour	 1.1-Originals: Defination, Types of originals- and transmission originals. 1.2- Classification of originals: Line originals, Continuous tone originals, Colour originals, Halftone originals and Merchandise(product) samples-Handling of Originals. 1.3- Light and Color: Seeing and measuring colors-Principles of color- Color as a wave length- The human perception of color. 1.4- The properties of colour: hue, saturation and brightness. 1.5- The electromagnetic spectrum and the visible spectrum, Color reproduction principles: Additive color theory and Subtractive color theory. 	(in Hrs)
2	Digital Reproduction Techniques	 2.1- Digital camera-Basics elements/parts of digital camera: The camera body, optics, image recording sensors, view finder, image storage, batteries, buttons and controls, flash ,accessory and computer transfer interface. 2.2- image capturing techniques using Digital camera, Scanner and photo CD. 2.3- Image editing and manipulations: Image correction and enhancement, sharpening and total adjustments. 	8
3	Line and Haltone photography	3.1- Line Reproduction: Steps involved in line Negative Reproduction .3.2- Halftone Reproduction- Highlight, Middle tone	7

4	Film Processing	and shadow areas. Haltone Screens, Screen Ruling, Screen angle and Screen Resolution. 3.3- Working Principles of Scanners and their types-Working principles of Flat bed scanner and Drum Scanners. 3.4- Steps in Halftone Reproduction using Scanner. 4.1- Photographic Films: Types of Films-orthochromatic film, panchromatic films, blue sensitive films. Fixed contrast and film speed. 4.2- Structures of photographic films. 4.3-Film processing chemicals: The photographic emulsion, developer solutions, stop bath solutions, fixer solutions, accessories- processing trays and processing tanks. 4.5- Computer to film technology: Workflow, advantages of CTF technology. Film imagesetters Types, working principles of different types of film imagesetters.	8
5	Offset Plate Processing	 5.1- Types of plantes- Wipe-on Plates and Presensitized plates. 5.2- Facilities and Equipments used in plate Making department- Printing Down Frame, Automatic plate processor and plate processing steps. 5.3- Control of plate making variables- Quality control aids: Plate sensitivity guide, GATF star target, UGRA plate control wedge and GAFT do gain scale. 5.4- Processing steps involved in preparation of PS plates and Wipe-on Plates. 5.5- Plate making troubles: Wipe-on plates troubles and PS plates troubles. 	10
	Class test	Three test of 1hrs.	3 hrs.

11. List of books:-

Sl.No.	Title of book	Author	Publication
	Colour and its Reproduction	Gary field	
	Graphic Reproduction Photography	James Walter Burden	

Introduction to prepress	Hugh M. Speirs	
Line Photography	Karl Davis Robinson	

Image Processing–(Lab) Code–Pt-402 (P)

Total Marks: - 50

Practical: - 25
Sessional: - 25
Pass Marks: - 8
Pass Marks: - 9

Skills to be developed – a) Intellectual skills –

- i. Knowledge of basic processes related to Image Processing ii. Identify & selection of various tools, equipment & software.
- b) Operating skills -
 - i. Operate, control different machines & equipment
 - ii. Inspect/ produce the job for specified dimensions
 - iii. safety practices/ Care & maintenance of the tools & machines.

List of the practical

- 1. Comparative study of various materials and equipment used in image generation Department.
- 2. Assembling positive for four colour jobs.
- 3. Layout preparation
- 4. Study of wipe-on plate
- 5. Study of albumin plates and deep-etch plate.
- 6. Preparation of pre-sensitized plate
- 7. Study of gripper margin and registration processes.
- 8. Study of Flexographic plate and gravure cylinder
- 9. Study of digital plates
- 10. Surface preparation for screen printing processes

Reference books:-

- 1. Colour and its reproduction Gary Field
- 2. Graphics Reproduction Photography James Walter Burden
- **3.** Introduction to Prepress Hugh M. Speirs

1. Course Title: Printer's Material Science-I

Course Code: Pt – 403
 Semester: 4th Semester

4. Aim: To make students acquainted with all the physicochemical processes that require monitoring and close control in different printing processes for good quality printing.

Objective: The students will be able to

- 1. Differentiate between lyophobic and lyophilic colloids used in different printing processes.
- 2. Identify the different polymeric substrates used for printing.
- 3. Select inks and adhesives for suitable printing and printed substrates respectively.
- 4. Prepare Fountain solution with fountain concentrate by correct dosage to avoid press problems.
- 5. Measure total hardness and conductivity of water to determine whether the water available is suitable for the printing process and take proper steps to make it suitable for the process.
- 6. Identify printing problems that arise from the use of inks with higher or lower viscosity than that required for the particular printing process.
- 7. Determine the pH of fountain solution, ink, adhesive or paper if need arises.
- 8. Take necessary precautions to safeguard himself and the environment from adverse effects of chemicals and wastes generated in the workplace.

Pre-Requisite: 1. Elementary knowledge of Atomic structure, Chemical Bonding, pH,Hardness of Water and Surface Tension (taught in first semester).

Polymer,

Course Outcomes (CO's)		
CO-1		erstand Colloids- its definition, classification, properties, stability, rent types and differences of colloids and gels, suitability of colloids and
CO-2	vulca	viedge of natural and synthetic polymer and its properties, properties of inized rubber and its uses, materials used in inking and dampeing rs, photopolymers- its properties and applications.
CO-3	Unde grain	erstand metals as image carriers, choices of matels, materials used for ing.
CO-4		vledge of lubricants, definition, types, constituents, additives, acteristics and uses.
CO-5		rstand surface tension and surface energy, angle of contact, surfactant wetting agents, details of wetting process used in printing.
CO-6		erstand viscosity- units and measurements, range of viscosity in printing ess, troubleshooting, viscosity of adhesive in laminated printed erials

Programme Outcomes (F	PO's)
PO-1	Apply the knowledge of mathematics and science to understand engineering fundamentals and to solve Printing Technology problems
PO-2	Design and conduct experiments of Printing Technology as well as analyse and interpret data.

PO-3	Identify, formulate and solve Printing Technology problems.
PO-4	Use the techniques, skills and modern engineering tools necessary for
10-4	engineering practices.
PO-5	Understand professional ethics and responsibility to extend the benefit of
PO-3	the Printing Technology projects to the society.
PO-6	Communicate effectively both verbally and in writing within the engineering
PO-6	community and with people in the society.
DO 7	Recognize the need for, and an ability to engage in life long learning to
PO-7	incorporate technological innovations.

11. List of books:-

Sl.No.	Title of book	Author	Publication
1	Chemistry in Printing, 2nd Edition	Tulika Das	Barnana Prakashani, 2011
2	Chemistry in Printing, 2nd Edition	N.R.Elred & T. Scarlet	GATF, 1992
3	The Lithographer's Manual	R. Blair, Editor-in- Chief, M.D. Thomas Ed	GATF, Inc., 1988
4	An Introduction to Science for Printers	G.R. Marshall	William Heinmann Ltd., 1963
5	Printing Science	F. Pateman and L.C. Young	Sir Isaac Pitman and Sons Ltd., 1963
6	Chemistry of Lithography	P.J. Hartsuch	Lithographic Technical Foundation Inc., 1961

1. Course Title: Gravure, Flexography and Screen printing.

Course Code: Pt – 404
 Semester: 4th Semester

4. **Aim** : To make the students understand about the technical aspects of gravure flexo and screen printing.

Objective: The students will be able to

- To keep the up to date about all the change in this cutting edge technologies.

Pre-Requisite: Elementary knowledge of Basic Printing & Production

Course Outcomes (CO's)		
CO-1		erstand basic principles of Gravure, Flexography and Screen printing sesses- its advanctages, limitations and characteristics.
CO-2	Knowledge of image carrier, details of image carrier preparation of flexography Gravure and Screen printing	
CO-3	Anil	wledge of Flexography Printing, inking systems, types and specifications of ox Cells and cleaning systems, roller selection, flexography plates, sleeve nology, flexo substrates, corona treatment, flexo substrates.
CO-4		wledge of Gravure printing, gravure cylinder, drying system, doctor blades, ression roller, gravure presses- solvents and inks.
CO-5		wledge of screen printing, mesh n squeegee selection, Screen pretreatment, ioning/ stretching, types of screen printing machines, inks, applications.

Programme Outcomes (PC	's)		
PO-1	Apply the knowledge of mathematics and science to understand engineering fundamentals and to solve Printing Technology problems		
PO-2	Design and conduct experiments of Printing Technology as well as analyse and interpret data.		
PO-3	Identify, formulate and solve Printing Technology problems.		
PO-4	Use the techniques, skills and modern engineering tools necessary for engineering practices.		
PO-5	Understand professional ethics and responsibility to extend the benefit of the Printing Technology projects to the society.		
PO-6	Communicate effectively both verbally and in writing within the engineering community and with people in the society.		
PO-7	Recognize the need for, and an ability to engage in life long learning to incorporate technological innovations.

7. Detailed course content:

Chapter No.	Chapter Title	Contents	Duration
			(in Hrs)
1	Basic Principles	 1.1-Principle of Flexography Printing Process- Main Sections of Flexography Printing machine: Unwinnd section, Printing section, Drying section and Rewind section. 1.2- Principle of Gravure printing Process: Advantages, Limitations and Characteristics of Gravure process, Main Sections of Gravure Printing Machine: Unwind section, Printing section, Drying section and Rewind section. 1.3-Principles of Screen Printing Process: Advantages of Screen Printing Process; Main Sections of Flat Bed Screen Printing Machine: Frame Base, Screen Fabric and Squeegee. 	9
2	Image Carrier Preparation	2.1- Flexography Image Carrier Preparation: Structure of Flexography Plate, Plate Preparation Methods- Rubber Plates Preparation, sheet photopolymer plates preparation and Liquide Photopolymer plates Preparation. 2.2- Gravure Image Carrier Preparation: Gravure Cylinder manufacture, Copper plating method, Gravure cylinder Preparation Methods-Conventional Method/Carbon Tissue Method of Gravure cylinder Preparation, Electromechanical Engraving method of Gravure cylinder preparation and Laser Engraving method of Grvure cylinder preparation. 2.3- Screen Printing Image Carrier Praparation: Screen Fabrics, Screen preparation by Direct Method,	8

		Screen preparation by Indirect /Transfer method and	
		Screen preparation by Direct /indirect method.	
3	Flexography Printing	3.1- Flexography Inking systems: Ink Metering, Anilox Roller, Types of Flexography linking systems 3.2- Types of Anilox Cells and Cleaning systems, The Anilox Roll, Anilox Roll specifications- Cell count, Cell depth, Cell volume, Types of Anilox roll besed on cell shapes- Inverted Pyramid shape cells, Quadrangular shapes cell and Trihelical shape cells. Types of Anilox Rolls based on roller surfaces- Laser engraved ceramic anilox rolls and Conventional or mechanically engraved chrome anilox rolls, Different types of Anilox Roll Cleaning Systems 3.3- Selection of Suitable Anilox Roller: Factor to be considered in selection of anilox roller. 3.4- Flexography plates- Structure and Mounting Techniques, Flexography plates: Metal backed plates, Magnetic plates, Flexographic plate Mounting: Plate mounting Fundamentals, Sticaky back Plate mounting ,Types of Flexography plates cylinders 3.5- Sleeve Technology, Direct laser engraving-Laser engraving on Rubber Rollers. 3.6- Corona Treatment, Flexo Substrates- Paper and Paperboard stocks, Corrugated stocks, Plastic	10
4	Gravure Printing	Films, Foils and Laminates. 4.1- Structure of Gravure Cylinder: Gravure cylinder parts-Axis, shaft, Diameter, Circumference and Face length. 4.2- Gravure Drying System- Drying Chamber-Solvent Recovery Sysyetms- Environmetal Friendly Solvent Removal Systems. 4.3-Doctor Blade – Structure, Types and Mechanisms of doctor blade. 4.4- Impression Roller- Structure, Types and Mechanisms of Impression Roller 4.5- Gravure Presses- Gravure Packaging Presses, Gravure Label Presses and Gravure publication Presses. 4.6- Gravure Solvent based inks, Gravure Water based inks, Gravure EB inks	6
5	Screen Printing	based inks, Gravure UV and Gravure EB inks. 5.1- Mesh, Squeegee Selection, Mesh/Woven screen Printing Fabric:Materials used for Screen printing Fabrics, Squeegee hardness and Squeegee materials. 5.2-Screen Pretreament, Screen Tensioning/Stretching: Basic steps in Screen	9

	Tensioning, Stretching the Screen Printing Fabric-	
	Manual Stretching and Machine Stretching.	
	5.3- Types of Screen Printing Machines- Container	
	Screen Printing Mechine, Flat bed Hinged frame	
	(Automatic) Screen Press, Rotary Screen Printing	
	Press and Carousal Printing Machines.	
	5.4- Screen Printing Inks- Types, Properties, Types	
	of Screen Printing Inks for specific Application	
	5.5- Screen Printing Applications: Screen Printing on	
	Curved Surfaces.	
Class test	Three test of 1hrs.	3 hrs.

1. Course Title: Typesetting & Composition

Course Code : Pt – 405
 Semester : 4th Semester

4. Aim:

Every printed product consists of Text portion and illustrations, with the former occupying a predominant portion. Knowledge of text setting methods and equipment used for setting text that is broadly termed "Typesetting & Composition" therefore very essential. The aim of this subject is to study Typesetting & Composition as an important part of Print production techniques, to enable the students to make judgement about the aspect of printing, particularly in relation to the requirements of designing the printed products. This will cover development of typesetting methods, preparation for typesetting, typesetting inputs and outputs, planning and proofing. On successful completion of the course, the students will be in a position to:—

Objective: The students will be able to

- (i) Understand the basic factors for Typesetting;
- (ii) Understanding the Methods of Composition;
- (iii) Understand the role of Computer assisted composition;
- (iv) Understand the proof reading marks and techniques;
- (v) Appreciate the role of page make-up and assembly in print production;
- (vi) Understand the role of Proofing;
- (vii) Appreciate the role of Planning & Production.

Pre-Requisite:

Elementary knowledge of Basic Printing & Production

Course Outcomes (CO's)				
CO-1	Understand the essential factors of typesetting and suitability			
CO-2	understand the mechanical methods of composition - principles and overview.			
CO-3	Understand computer ssisted composition- working principles and overview, different fonts, software			
CO-4	undrestand proof reading, qualities and rules, proof reading marks			
CO-5	Knov	rledge of page maku up and assembly and its kinds, parts of a book.		
CO-6	Understand the role of proofing, different methods- reflex, transfer, then photographic, electrostatic, diazo, laser and inkjet.			
CO-7	Understand planning and production, progression of work, factors, scheduling a progress.			

Programme Outcomes (F	PO's)
PO-1	Apply the knowledge of mathematics and science to understand engineering fundamentals and to solve Printing Technology problems
PO-2	Design and conduct experiments of Printing Technology as well as analyse and interpret data.
PO-3	Identify, formulate and solve Printing Technology problems.
PO-4	Use the techniques, skills and modern engineering tools necessary for engineering practices.

PO-5	Understand professional ethics and responsibility to extend the benefit of the Printing Technology projects to the society.
PO-6	Communicate effectively both verbally and in writing within the engineering community and with people in the society.
PO-7	Recognize the need for, and an ability to engage in life long learning to incorporate technological innovations.

5. Teaching Scheme (In Hrs):

Typesetting & Composition–(Lab) Code–Pt-405 (P)

Total Marks: - 50

Practical: - 25
Sessional: - 25
Pass Marks: - 8
Pass Marks: - 9

Skills to be developed –

a) Intellectual skills –

- i. Knowledge of basic processes related to typesetting & composition
- ii. Identify & selection of various tools, equipment & software.

b) Operating skills --

- i. Operate, control different machines & equipment
- ii. Inspect/ produce the job for specified dimensions
- iii. safety practices/ Care & maintenance of the tools & machines.

List of the practical

1. Practice on Hand Composing

Study of different fonts / quoins / quads and other composing materials Composing a block/passage, tabular matter, more than one point in a line Proofing and correction

2. Demonstration on Mechanical Composing Machines

Monotype Keyboard & Caster

3. Demonstration on Line Casting Machines

Linotype Casting mechanism Releasing and assembling of matrices and space bands Distributing mechanism

4. Appreciating Electronic Composition for Printing Purposes

Introducing page making Software – The utilities – Understanding page maker

windows – Using the tool book and control box – Creating a new file – Page dimensions – Orientation – Start page number – Number of page and master page formulation – Option – double side publication – Opening a file/publication – Directories/driver/open/close/saving a file – Import/export – Using different filters – Correcting unknown words – Text and paragraph formatting – Using fonts – Selecting sizes – Changing the leading – Changing the width of characters – Changing the tracking characters – Tab setting – Apply styles – Selecting paragraphs to format – Proving a background for reverse – Sending an object to the back – Bringing an object to the front – Rounding corners/rules/boxes – Bullets and numbering – Drop caps and other utilities – Running header and footer – Printing a publication – Print to copies / collate / reverse / proof / all (pages) / ranges / Both / even / odd / size / orientation / tile / manual / auto / scale / reduce to fit.

PROFESSIONAL PRACTICE -II

4th SEMESTER, PRINTING TECHNOLOGY

CODE: Pt-410

THEORY SCHEME: PRACTICAL SCHEME:

Theory: 1hr/week Practical assessment: 25 marks

Practical: 2hrs/week Practical test: 25 marks

Credit: 2

A) RATIONAL:-

To develop general confidence, ability to communicate and attitude, in addition to basic technological concepts through industrial visits, guest lectures on technical topics and conducting group discussions.

B) AIMS AND OBJECTIVES:-

The student will be able to:

- Preparing report on industrial visits, expert lectures.
- Interacting with peers to share thoughts.
- Prepare notes for given topic.
- Presentation in seminar, group discussion on improvement of communication skills.
- Acquire information from different sources.

C) PRE- REQUISITE:-

- 1. Desire to gain comparable knowledge and skills of various activities in various areas of importance.
 - 2. Eagerness to participate in group work and to share thoughts with group members.

Activities:

1. INDUSTRIAL/FIELD VISIT: -

10

HRS.

Structured field visits be arranged and report of the same should be submitted by the individual student, to form part of the team work.

Visits to following companies:

SCTE, ASSAM | NOVEMBER'2018

- c. Bhavani Printers Pvt. Ltd.
- d. Polymer Pvt. Ltd.
- 2. GUEST LECTURES: (Any three) Lectures by professional /industrial expert/ student

Seminars on the following areas.

-10 HRS

- a) Online Printing
- b) Pre-Print Technology

Individual report of the above lecture should be submitted by the students.

- 3. GROUP DISCUSSION: (Any TWO among a group of four to five students). Topic and time duration of the group discussion to be decided by concerned teacher.

 -10 HRS.
 - c. Current topics related to Printing Technology.
 - d. Latest trends on Digital Printing
- 4. STUDENTS ACTIVITY: The students in a group of 4 to 5 will perform any one of the following activities. $-10 \, \text{HRS}$.
 - a. Identify the various printing tools and equipments and write their functions.
 - b. Tree plantation inside or outside of the institute campus.
 - c. Help in flood relief camp (by all students)
 - d. Other co- curricular and extracurricular activity.

EXAMINATION SCHEME (on Practical assessment)

Continuous internal assessment of 25 marks is to be carried out by the teachers.

Distribution of marks: -

Activities =10,

Group discussion = 5,

Field visits=5 and

Guest lecturer attendance and

Report=5.

1. Course Title: Digital Prepress

Course Code: Pt – 501
 Semester: 5th Semester

4. Aim : Visual information taken in an electronic form in order to output film for pointing.

Objective: In graphic arts world, 75 percent of all prepress work is now done digitally. Prepress, using traditional methods or digital prepress, emcopasses the entire idea of document making to the final product.

Pre-Requisite: Elementary knowledge of Basic Printing & Production

Course Outcomes (CO's)		
CO-1	derstand digital printed page, dot shape, AM and FM screen olutions, knowledge of UCR, GCR & USM - its advantages an	•
CO-2	derstand the specifications of a digital camera, definition an D & CMOS, functions and advantages of scanner, techniques ligitizing.	
CO-3	derstand CTF & CTP, Full sheet output, imposition workflows ter image processor, file formats- TIFF, JPEG, GIF, LJW etc., o mats.	•
CO-4	derstand colour management- definitions, needs, targets, m our, profiles for monitor, scanner and printer, ICC profiles	easurement of
CO-5	derstand computer to plate system - its types, advantages, c rkflows- pdf & jdf, types of lasers, different types of plates in	-

Programme Outcomes (F	PO's)
PO-1	Apply the knowledge of mathematics and science to understand engineering fundamentals and to solve Printing Technology problems
PO-2	Design and conduct experiments of Printing Technology as well as analyse and interpret data.
PO-3	Identify, formulate and solve Printing Technology problems.
PO-4	Use the techniques, skills and modern engineering tools necessary for engineering practices.
PO-5	Understand professional ethics and responsibility to extend the benefit of the Printing Technology projects to the society.
PO-6	Communicate effectively both verbally and in writing within the engineering community and with people in the society.
PO-7	Recognize the need for, and an ability to engage in life long learning to incorporate technological innovations.

7. Detailed course content:

Chapter No.	Chapter Title	Contents	Duration
			(in Hrs)
1	Digital Prepress- Introduction	1.1-Digital Description of the Printed page-Elements of Digital page-Integration of Text, Images, Graphics Layout and prepress checklist. 1.2-dot Shape- Round, square, elliptical and composite shapes, Amplitude Modulation/frequency Modulation Screening- Difference between AM and FM screening and Benefits of FM screening. 1.3-Input and Output Resolution-Scanning Frequency, Picture element and Scanning frequency formula. Image- dependent Effects and Corrections-Spreads and Chokes, Trapping, Moire and interference of dot pattern. 1.4-Under Colour Removal, Gray Component Replacement, and Unsharp Masking Techniques-Advantages of UCR, GCR & USM. Difference between UCR and GCR. Chromatic composition and achromatic composition.	9
2	Digital Photography & Digital Proofing	2.1- Image capturing with Digital camera- Special features of Digital Camera- Tone Value Quantization, Focal length of lens and Aspect ratio Link up to a Computer. 2.2- Charge Coupled Device and Complementary Metal Oxide Semiconductor- Definition and difference between CCD and CMOS. 2.3- Scanner design and models, Flat bed Scanners-Diagram, functions of scanners and advantages of flatbed scanner. 2.4- Digitizing and Redigitzing- Various Redigitizing Tecniques- Copy dot, Descreening and mixed mode. Digital Proofs and Press Proofs.	8
3	Digital Image Assembly and	3.1-Page Assembly and Imposition- Digital assembly	10

	Data Formats	techniques of CTF and CTP. Imposition – Image		
	Data I Offiats	register and alignment, Imposition plans- sheet wise,		
		Work and turn and Work and tumble		
		3.2- Full Sheet Output, Full sheet production in the		
		workflow, Imposition through Software and Full		
		sheet production workflow.		
		3.3- Imposition Workflows- Types of Imposition		
		programs, Imposition sheet, demand on imposition		
		programs and Imposition workflows and		
		considerations for impositions.		
		3.4-Raster Image Processor(RIP)- Workflow		
		diagram- Interpreter, Renderer, demands on		
		Imposition programs and Imposition workflows and		
		considerations for impositions. And Bitmap. File		
		Formats – Postscript, TIFF, JPEG, GIF, LZW, EPS,		
		PDF, PPF, 1 bit TIFF and JDF.		
		3.5- Data Formats – Bitmap & Vector, Applications		
		of storage media- Data distribution, Archiving and		
4	G 1	Backup or transport.	0	
4	Colour	4.1- Definition of Colour, Colour Management and	8	
	Management	Needs- Targets of Print Colour Management, CIE		
		Chromaticity Diagram- CIE Lab Values-		
		Spectrophotometry description of color.		
		4.2- Colour measuring instruments, Colorimetry and		
		Densitometry- Densitometer, Spectrophotometer		
		diagrams and functions. 4.3- Pfofiles for Monitor, Scanner and Printer-		
		International Colour Consortium- ICC Profiles,		
		generating ICC profiles for monitor, Scanner and		
		Printer, Device- independent CIE LAB colour space,		
		rendering intents- perceptual, Relative, Absolute and		
		saturation.		
5	Computer to	5.1- Types of Computer to plate System – Image	7	
	Plates system	register and Alignment, Types of CTPs, Advantage	,	
		of CTP, Components of Computer to Plate system,		
		Different Configuration of CTPs- Flatbed, Internal		
		Drum and External Drum		
		5.2- Workflows- PDF and JDF- portable Document		
		Format, Job Defination Format and their advantages.		
		Preflighting- Preflighting techniques, the process		
		and preflighting checks.		
		5.3- Computer to plate workflow, Types of Lasers-		
		UV, Violet, Thermal and Computer to plate		
		technology for flexography, gravure and screen		
		printing processes.		
		5.4- Printing plates for Digital Imaging- Types of		
		plates used in CTP- Silver halide plates,		
		photopolymer plates, Thermal plates, Inkjet plates-		
	C1	Automatic plate processor diagram and its functions.		1
i	Class test	Three test of 1hrs.	3	hrs.

Digital Prepress-(Lab) Code-Pt-501 (P)

Total Marks: - 50

Practical: - 25
Sessional: - 25
Pass Marks: - 8
Pass Marks: - 9

Skills to be developed –

a) Intellectual skills -

- i. Knowledge of basic processes related to Digital Prepress
- ii. Identify & selection of various tools, equipment & software.

b) Operating skills --

- i. Operate, control different machines & equipment
- ii. Inspect/ produce the job for specified dimensions
- iii. safety practices/ Care & maintenance of the tools & machines.

List of the practical

1. WINDOWS - ASSIGNMENT

- 1.1 Acquaintance with the Basic elements of Windows Parts of Window, Types of Window, Types of Icons.
- 1.2 Basic Mouse Technique Basic Keyboard Technique, Choosing & Selecting items, Choosing Commands from Menus, Using the Control Menu Commands.

2.0 SCANNING - ASSIGNMENT

- 2.1 Capturing image from Reflection copy, Negative & Transparency.
- 2.2 Adjusting the scanning factors.
- 2.3 Changing of Mode and colour correction.
- 2.4 Use of filters.
- 2.5 Saving the file under specific file format.
- 2.6 Importing different files to the Page Layout Graphic Software.

3.0 PIXEL BASED GRAPHIC SOFTWARE - ASSIGNMENT

- 3.1 Create a new file, manipulate using different filters, and save it under specific file format
- 3.2 Export/Import files through different filters, close & exit.

4.0 VECTOR BASED ILLUSTRATING SOFTWARE - ASSIGNMENT

- 4.1 Creating a new drawing, using options save it under specific file format.
- 4.2 Export/Import files through different filters, close & exit.

5.0 PAGE LAYOUT GRAPHIC SOFTWARE - ASSIGNMENT

- 5.1 Practice cursor movement, create file, composing text, and manipulate file (save, cut, copy, paste, delete & print).
- 5.2 Document set up, page size, margin, select, draw lines / boxes etc., merging text & graphics.
- 5.3 Justification, alignment, changes of type font/size/style etc.

6.0 IMAGE SETTER/PLATESETTER & AUTO FILM PROCESSOR - ASSIGNMENT

- 6.1 Study of Image setter/Platesetter, RIP, Calibration of IS Software.
- 6.2 Study of Image recording, processing & their functions.

Reference books:-

- 1. The Art of Colour Johannes Ittem
- 2. Digital Colour Printing Technology Biswanath Chakkarvarthy

1. Course Title : Offset Printing Technology

2. Course Code : Pt – 502
3. Semester : 5th Semester

4. **Aim**: The most common printing technique that transfer the inked image from a plate to the printing surface through a robber blanket.

Objective: The students will be able to Explain the offset printing techniques and their applications, the preparation process and comparison with each other to provide the necessary information.

Pre-Requisite: Elementary knowledge of Basic Printing & Digital Pre-Press Technique

Course Outcome (CO's)	es				
CO-1		stand lithography and offset printing, structure of offset machine, sheetfed presses, ent types of presses.			
CO-2	CO-2 Understand the structure of an offset press - different cylinders, types of blankets, inking system, dampening system and troubleshooting.				
CO-3	Understand sheet control and delivery in offset press - types of feeders, feeder head components, sheet registering devices, sheet insertion devices, delivery section.				
CO-4		stand the history of webbed offset press, types of reel stands, automatic splicer, web of rollers.			
CO-5		rstand the delivery unit of webbed offset press, types of dryers, folders, different ary equipments.			

Programme Outcomes (PO's)		
PO-1		the knowledge of mathematics and science to understand engineering fundamentals solve Printing Technology problems
PO-2	Design	and conduct experiments of Printing Technology as well as analyse and interpret data.
PO-3	Identif	y, formulate and solve Printing Technology problems.
PO-4	Use the	e techniques, skills and modern engineering tools necessary for engineering practices.
PO-5		stand professional ethics and responsibility to extend the benefit of the Printing plogy projects to the society.
PO-6		unicate effectively both verbally and in writing within the engineering community and eople in the society.
PO-7		nize the need for, and an ability to engage in life long learning to incorporate logical innovations.

1	Introduction to Sheetfed Offset Press	 1.1. Principl4es of Lithography and offset printing 1.2. Units of Offset machine- Feeding unit, Printing Unit and Delivery unit. 1.3. Configuration and Structure of Sheetfed Presses: Single Colour, Multi colour and convertible presses. 1.4. Type of Presses: Inline Press, Stack Press, Blanket-to Blanket Press and Common Impression cylinder Press. 	8
2	Printing Unit in Offset Press	 1.1 Construction and functions of place Cylinder, Blanket Cylinder, Impression Cyliner, Transfer Cylinder and Delivery Cylinder 1.2 Types of Blankets: Conventional blanket and compressible blanket. 1.3 Inking Syestem- Construction, Roller Streak and Glazed Rollers. 1.4 Inking System Problems- Roller Streaks and Glazed Rollers. 1.5 Dampening System- Construction, of Dampening Solution- PH Conductivity and Sampenning system Roller setting. Types of Dmpending System. Conventional or Intermittent, Continous dampending system and Dahlgren dampening system. 	10
3	Sheet Control and Delivery in Ofset Press	3.1 Types of Feeders- Friction and Suction, Types of Suction Feeders- Single sheet feeder and Stream Feeder. 3.2 Feeder Head Components- Feeder Head, Air blast Nozle, Rear Pickup Suckers, Forwarding Pickup Suckers, Sheet Steadiers, Separator Brushes and finders. Feed board elements- metal wheel, rubber tyred wheel, brush wheels, tapes and ball smoothener. 3.3 Sheet Registering Devices- Front lay and Sidelay, Types of Front lay and Sidelay. Sheet	8

		detectors double sheet, no sheet and cross sheet detectors 3.4 Sheet Insertions Devices – Swing arm, Rotary, Tumbler and Overfeed Grippers. 3.5 Delivery Section- Delivery Assist Devices, Suction slows down Rollers, Blow downs, Wedges ,Skeleton, Wheels, Star Wheels and Anti Precautions in press room.				
4	Webfed Offset Press – Infeed and Web Guiding Devices	 4.1 Historical development of webfed offset preses. Types of Reel Stands- Single reel stands, Double reel stands and three reel stands. 4.2 Automatic Splicers- Zero Speed Paster, Working Principle and function of Zero Speed paster, Purpose of Festoom. Flying Paster- working Principle and fundction of Flying paster. 4.3 Web Control – Dancer Roller, Metering Roller, Box Tilt, Web breb deterctors and Bustle Wheel. 	7			
5	Webfed Offset Press – Delivery Unit	5.1 Types of Dryers- Open flame, High Velocity Air and Combination Dryer, Chill Rollers- Early stage chill rolls, Baffle plate chil roll and Jacketed chill rools. 5.2- Types of Folders- Former folder, Double Former Folder, Jaw Folder, Chopper Folder, Combinnation Folder and Riboon Foler 5.3. Auxiliary Equipments – Stackers, Bundiles, Sheeters, Perfofactors and Imprinters.	9			
	Class test	Three test of 1hrs.	•	3	hrs

Offset Printing Technology –(Lab) Code–Pt-502 (P)

Total Marks: - 50

Practical: - 25
Sessional: - 25
Pass Marks: - 8
Pass Marks: - 9

Skills to be developed –

- a) Intellectual skills
 - i. Knowledge of basic processes related to Offset Printing Technology
 - ii. Identify & selection of various tools, equipment & software.
- b) Machine skills -
 - i. Operate, control different machines & equipment
 - ii. Inspect/ produce the job for specified dimensions
 - iii. safety practices/ Care & maintenance of the tools & machines.

List of the practical

- 1. Setting of Feeder Pneumatic Control, Setting Feeder Ramp, Setting Side Lay, Adjusting Detectors, and Front Lay alignment Problems & Solution.
- 2. Cylinder Parallelism, Thumb test, and Filler Gauge Test.
- 3. Roller Setting Form roller with plate (ink band test), Form roller with oscillating (Filler gauge test) setting of Ductor roller, Connection with toggle mechanism, drive cam, wobble gear.
- **4.** Roller setting dampening rollers, motorised dampening.
- **5.** Pile Lifting System problems & remedies.
- **6.** Impression on/off systems, problem & remedies.
- 7. Pneumatic insertion device and transfer point.
- **8.** Delivery gripper setting and transfer point.
- 9. Jogger problems and remedies, delivery pile lowering mechanism.
- 10. Lubrication system.
- 11. Machine timing.

Reference books:-

- 1. A Manual for Lithographic Press Operations A. S. Porter
- 2. Offset Lithography S. Jaganathan, K. T. Chary.

1. Course Title: Printer's Material Science-II

Course Code: Pt – 503
 Semester: 5th Semester

4. **Aim** : To make students acquainted with all the chemical aspects of printing so that they may be able to solveall chemistry related problems that may arise during printing.

Objective: The students will be able to

- 1. Produce a perfect negative or positive film whenever required.
- 2. Prepare suitable image carrier for any printing process.
- 3. Make proper selection of ink compatible with printing substrate, printing process and end-use of the substrate.
- 4. Understand the necessity for colour management.
- 5. Make correct requisition of paper for any printing process.

Pre-Requisite: Elementary knowledge of organic chemistry (taught in second semester).

Course Outcomes (CO's)		
CO-1	phot	erstand photogrphic materials and chemistry of photography, knowledge of ographic emulsion and film base, film exposure, development bath and fixing chemistry of washing
CO-2		erstand the image carriers - offset plate making, gravure cylinder making, graphic plate making, screen printing process, use of computer.
CO-3	class	rledge of printing inks and toners, its nature, raw materials used in ink, fication and differences of ink, physical properties, rheological properties, ems encountered in ink, toners.
CO-4		rstand colour science - basic concept, perception, types of colours, attributes of ir, colour differences and management.
CO-5	struc	erstand the basics of paper, constituent raw materials, properties of paper- tural, physical,strength, optical, resistance, required characteristics of paper for paper, package printing, troubleshooting and waste management.
CO-6		erstand the packaging materials - definition, materials used, properties, material tion, lamination and testing.

Programme Outcomes (F	PO's)				
PO-1		y the knowledge of mathematics and science to understand engineering amentals and to solve Printing Technology problems			
PO-2	_	gn and conduct experiments of Printing Technology as well as analyse and pret data.			
PO-3	Ident	ify, formulate and solve Printing Technology problems.			
PO-4	Use t	he techniques, skills and modern engineering tools necessary for engineering ices.			
PO-5	l .	erstand professional ethics and responsibility to extend the benefit of the ing Technology projects to the society.			
I PO-6		Communicate effectively both verbally and in writing within the engineering ommunity and with people in the society.			
PO-7	l .	gnize the need for, and an ability to engage in life long learning to incorporate nological innovations.

1. Course Title: Plano graphic Printing Technique I

Course Code: Pt – 504
 Semester: 5th Semester

4. Aim : Among the wide spectrum of different printing processes the most versatile and popular process is Plano graphic process. A wide range of substrates can be printed by Plano graphic process. Continuous R and D are going on in this process into different printing machines manufacturing companies and allied trades. There are tremendous job opportunities for the printing students in this field. The rapid changes and development in the field of Plano graphic technology obviate certain very old methodology and claim inclusion of up to date concept. The present syllabus reflects this rationale.

Objective: The students will be able to

- 1) Understand the four units that make up any printing press.
- 2) Understanding the development of press design from platen presses to rotary presses.
- 3) Understanding the principle of offset printing
- 4) Understanding the feeding unit, registration unit, printing unit, inking unit, dampening unit and delivery unit operation of an offset lithographic press.
- 5) Understanding the basic steps in setting up and operating an offset lithographic press
- 6) Understanding the several quality control devices commonly used in offset printing.
- 7) Understanding the concept of offset blanket
- 8) Understanding the feeding, dampening and inking systems of offset presses.
- 9) Understanding the common press problems.
- 10) Understanding the different imposition schemes, precautionary measures in machine room.

Pre-Requisite: Elementary knowledge of Basic Printing & Pre-Press Repro Technique

Course Outcom (CO's)	nes				
CO-1		Understand the history and basics of planographic printing, its classification, different processes, and visual characteristics.			
CO-2		Understand the web offset printing, different units of web offset machine, knowledge of web delivery			
CO-3		Understand the principles of lithography and offset printing, different materials and chemicals used.			
CO-4		Understand the offet press, driography, digital printing - introduction, substrate used, limitations.			
CO-5		Understand the different types of dampening system, dampener cleaningproblems related to dampening.			
CO-6		Understand the basics of imposition and planning, kinds of imposition.			
Programme					
Outcomes (PO					
PO-1		the knowledge of mathematics and science to understand engineering fundamentals and ve Printing Technology problems			
PO-2	Design	n and conduct experiments of Printing Technology as well as analyse and interpret data.			
PO-3	Identi	fy, formulate and solve Printing Technology problems.			
PO-4	Use th	ne techniques, skills and modern engineering tools necessary for engineering practices.			

PRINTING TECHNOLOGY (NEW SYLLABUS), 3rd to 6th SEMESTER

PO-5	Understand professional ethics and responsibility to extend the benefit of the Printing
PU-3	Technology projects to the society.
PO-6	Communicate effectively both verbally and in writing within the engineering community and
PU-6	with people in the society.
DO 7	Recognize the need for, and an ability to engage in life long learning to incorporate
PO-7	technological innovations.

Plano graphic Painting Technique –I (Lab) Code–Pt-504 (P)

Total Marks: - 50

Practical: - 25
Sessional: - 25
Pass Marks: - 8
Pass Marks: - 9

Skills to be developed -

- a) Intellectual skills
 - i. Knowledge of basic processes related to Plano graphic Painting Technique -I
 - ii. Identify & selection of various tools, equipment & software.

b) Machine skills --

- i. Operate, control different machines & equipment
- ii. Inspect/ produce the job for specified dimensions
- iii. safety practices/ Care & maintenance of the tools & machines.

List of the practical

- 1. Demonstration of Single colour sheet-fed offset press arrangement
- 2. Functions of different units of a sheet-fed offset machine
- 3. Application of different chemicals used in offset press
- 4. Preparation of fountain solution
- 5. Mounting plate on plate cylinder with properly adjusted packing
- 6. Fitting of offset blanket checking the levelness of the blanket preparing it for blanket
- 7. Setting of dampening rollers
- 8. Setting of ink form rollers

Reference books:-

1. Course Title: PRESS WORK

Course Code: Pt – 505
 Semester: 5th Semester

4. **Aim** : Getting the output through a printing machine is the most important operation for completing the print production. This subject known as Presswork - I is one of the key subject to make a clear and sound knowledge in some of the major print production systems and supplies. This will enable the students to make judgement about the aspect of printing, particularly the selection of a particular process to choose for a specific print production.

Objective: The students will be able to

- (i) understand the basic and clear classification of all kinds of printing processes;
- (ii) understand the details divisions and subdivisions of letterpress printing machines, their applications and uses, characteristics and identifications of their products- merits and demerits of various letterpress machines;
- (iii) understand the principal mechanism of various letterpress and sheet-fed machines, their constructional differences in the printing unit and operational features;
- (iv) understanding the various feeding and delivery mechanism in printing machines;
- (v) appreciate the relational aspects of various materials used in presswork.

Pre-Requisite: Elementary knowledge of Basic Printing & Production

Course	
Outcomes (CO's)	
CO-1	Knowledge of different relief printing machines- their characteristics and applications, understand the divisions and subdivisions of letterpress printing machines- their characteristics, applications, merits, demerits, unitwise divisions.
CO-2	Understand the working principle of letter press platen machine and its different units and different job related operations, knowledge of various methods used in letterpress printing and its applications.
CO-3	Understand the principles and operational features of Stop cylinder machines, Single revolution machines and Two revolution machines and their comparitions.
CO-4	Understand the different units of feeder and their roles, advantages and disadvantages, activities related to delivery system
CO-5	Understand the features and classification of different presses, knowledge of unwinding, rewinding units, inking arrangement, anilox roller, inks and substrates.
CO-6	Knowledge of web tension control, splicer, compensator.

Programm	
Outcomes (P	's)
PO-1	Apply the knowledge of mathematics and science to understand engineering fundamentals and o solve Printing Technology problems
PO-2	Design and conduct experiments of Printing Technology as well as analyse and interpret data.

PRINTING TECHNOLOGY (NEW SYLLABUS), 3rd to 6th SEMESTER

PO-3	Identify, formulate and solve Printing Technology problems.
PO-4	Use the techniques, skills and modern engineering tools necessary for engineering practices.
PO-5	Understand professional ethics and responsibility to extend the benefit of the Printing Technology projects to the society.
PO-6	Communicate effectively both verbally and in writing within the engineering community and with people in the society.
PO-7	Recognize the need for, and an ability to engage in life long learning to incorporate technological innovations.

			(in Hrs)
1	Relief Printing	1.1 Classifications of various relief printing machines, their applications and uses, characteristics of the products. 1.2 Details of divisions and subdivisions of letterpress printing machines, their applications and uses, characteristics and identifications of their products- merits and demerits of various letterpress machines General unit wise division of a printing machine.	6
2	Letterpress Machines	2.1 Letterpress platen m/c-kinds-purposes-working principal of printing unit construction- construction of inking unit-different operation to run a job like packing, positioning, feeding etc. 2.2 Various packing and make ready methods used in letterpress printing – overlay, interlay, underlay, hard soft and medium packing- use and applications	7
3	Letterpress Sheet-Fed Cylinder Machines	 3.1 Stop cylinder machines – principles, operational features. 3.2 Single revolution machines - principles, operational features. 	7

		3.3 Two revolution machines - principles, operational		
		features.		
		3.4 Comparison of Stop, Single and Two revolution		
		machines.		
4	Automatic	4.1 Feeders- advantage and disadvantage-friction,	6	
	Feeders &	suction and combination-front and back separation-		
	Delivery	various detectors and paper control on ramps- front		
	System	and side lay, ionised air blower bar.		
		4.2 Delivery – kinds-fly, carriage and chain delivery-		
		joggers control of printed delivered sheets		
5	Flexography	5.1 Features, classification of various presses.	8	
	Press Work	5.2 Various unwinding and rewinding units, printing		
		units.		
		5.3 Inking arrangements, anilox roller.		
		5.4 Characteristics of ink and substrates.		
6	Web-Fed	6.1 Web tension control.	8	
	Machine	6.2 Splicer.		
		6.3 Compensator.		
	Class test	Three test of 1hrs.	4	hrs.

Presswork-(Lab) Code-Pt-505 (P)

Total Marks: - 50 Practical: - 25 Sessional: - 25

Pass Marks: - 8
Pass Marks: - 9

Skills to be developed –

a) Intellectual skills –

- i. Knowledge of basic processes related to Press Work
- ii. Identify & selection of various tools, equipment & software.

b) Operating skills --

- i. Operate, control different machines & equipment
- ii. Inspect/ produce the job for specified dimensions
- iii. safety practices/ Care & maintenance of the tools & machines.

List of the practical

- 1. Shop talk & Familiarisation with various machines -Letterpress, Flexography, Gravure & Small Offset workshop Making charts and layouts of the machine department.
- 2. Working on Automatic stop cylinder machine familiarisation with different units setting of feeders with pawl and ratchet system for various types and thickness of paper, setting of inking system with control measure, examining and changing of rollers, ink flow adjustment, setting of rollers, fixing the under lay Practice on Letterpress sheet fed machines.
- **3.** Air Compressor and accessories Demonstration & Shop talk.
- **4.** Static Electricity, Progressive Proof, Process Inks, Qualities of Papers by the help of AV Systems.

Reference books:-

- 1. Letterpress Printing Vol I & II C.S. Misra
- 2. Flexoghaphic Primer J. Page Crouch
- 3. Paper in Printing Process Banks
- 4. Cylinder Presses Ganderton

1. Course Title: Printing Machine Maintenance

Course Code: Pt – 506
 Semester: 5th Semester

4. Aim:

Maintenance of printing machines is important for many reasons. The delay in production for a equipment failure can create serious problem because printing is a service industry. Today's newspaper if supplied tomorrow is no longer news but history. Like other technological fields, new concepts and applications are developing continuously in maintenance also. This proposed syllabus is based on latest changes.

Objective: The students will be able to

- 1) Choose the right piece of printing equipment considering the end product requirement.
- 2) Understand the different lubricants and the importance of correct lubrication
- 3) Use different compressor in printing machines and do maintenance job.
- 4) Differentiate the various mechanical drives in the printing machines and work with them.
- 5) Select and maintain bearings in the printing machines.

Pre-Requisite:

Elementary knowledge of Basic Printing & Pre-Press Repro Technique

Course Outcor (CO's)	nes									
CO-2	1		Understand the factors effecting printing machine purchasing, guiding factors like cost, required desing considerations etc.							
CO-2	2		Understand theimportance of lubrication, its types, purposes and characteristics, maintenance failure.							
CO-S	3		Understand the use of pneumatic machines in printing, reciprocating and rotary compressor, aompressor maintenance.							
CO-4	1		Understand the role of bearing in printing machine, definition, type and selection of bearing, advantages, maintenance and failure of bearings.							
CO-5	5		Understand the mevhanical drives in printing machines, types and application of chains and sprocket, different types of belts and pullies, parts of machines like cam, follower, knowledge of gear terminology and types of gears.							
Programme Outcomes (PC										
PO-1			wledge of mathematics and science to understand engineering fundamentals and ng Technology problems							
PO-2	Desig	n and co	nduct experiments of Printing Technology as well as analyse and interpret data.							
PO-3	Identi	fy, form	ulate and solve Printing Technology problems.							
PO-4	Use th	ne techn	iques, skills and modern engineering tools necessary for engineering practices.							
PO-5		•	rofessional ethics and responsibility to extend the benefit of the Printing ojects to the society.							
PO-6		Communicate effectively both verbally and in writing within the engineering community and with people in the society.								
PO-7	_		need for, and an ability to engage in life long learning to incorporate innovations.							

5. Teaching Scheme (In Hrs):

7. Detailed course content:

Chapter No.	Chapter Title	Contents	Duration (in Hrs)
1	Printing Equipment Purchasing	1.1 Initial cost, installation of printing machines1.2 Printing equipment design consideration.1.3 Critical questions regarding printing equipment purchasing.	8
2	Lubrication	 2.1 Types of lubricants – Petroleum, animal and vegetable oils, grease, graphite (over-view only) 2.2 Purpose of lubrication – control of friction, control of wear, control of temperature, removal of contaminants, shock absorption. 2.3 Characteristic – wetting ability, surface tension, viscosity, adhesion. 2.4 Lubrication maintenance failure. 	10
3	Pneumatics in Printing	3.1 Reciprocating compressor in front separation feeder.3.2 Rotary compressor (vanes-type) in back separation feeder.3.3 Compressor maintenance.	8
4	Bearing used to printing machines	4.1 Selection of bearing, different types of bearings used in printing machine, definition.4.2 Bearing failure4.3 Advantages and maintenance.	6
5	Mechanical drives in printing machines	 5.1 Chain – Roller chain and its application areas in printing, Sprocket-with hub and without hub and its application in printing. Maintenance of chains and sprocket. 5.2 Belt and pulleys – Definition, classification, maintenance. Definition, application areas in printing. 	10

		5.3 Cam, follower, an overview of theoretical curve, working curve, base circle stroke and dwell.5.4 Gear terminology, material, different types of gears used in printing machines.(No mathematical calculations included anywhere).			
6	Class test	Three test of 1hrs.	3	hrs.

PROFESSIONAL PRACTICE -III

5th SEMESTER, PRINTING TECHNOLOGY

CODE: PT-510

THEORY SCHEME: PRACTICAL SCHEME:

Theory: 1hr/week Practical assessment: 25 marks

Practical: 2hrs/week Practical test: 25 marks

Credit: 2

A) RATIONAL:-

To develop general confidence, ability to communicate and attitude, in addition to basic technological concepts through industrial visits, guest lectures on technical topics and conducting group discussions.

B) AIMS AND OBJECTIVES:-

The student will be able to:

- Preparing report on industrial visits, expert lectures.
- Interacting with peers to share thoughts.
- Prepare notes for given topic.
- Presentation in seminar, group discussion on improvement of communication skills.
- Acquire information from different sources.

C) PRE- REQUISITE:-

- 1. Desire to gain comparable knowledge and skills of various activities in various areas of importance.
 - 2. Eagerness to participate in group work and to share thoughts with group members.

Activities:

1. INDUSTRIAL/FIELD VISIT: -

10

HRS.

Structured field visits be arranged and report of the same should be submitted by the individual student, to form part of the team work.

Visits to following companies:

- e. Genesys Press nearby Kahilipara, Guwhati
- f. Parkson's Ltd nearby Biahata Chariali, Guwahati
- 2. GUEST LECTURES: (Any three) Lectures by professional /industrial expert/ student

Seminars on the following areas.

-10 HRS

- c) Planographic Printing
- d) Printers Material Science

Individual report of the above lecture should be submitted by the students.

- 3. GROUP DISCUSSION: (Any TWO among a group of four to five students). Topic and time duration of the group discussion to be decided by concerned teacher.

 -10 HRS.
 - e. Offset Lithography.
 - f. Intaglio Printing
 - g. Relief Printing
- 4. STUDENTS ACTIVITY: The students in a group of 4 to 5 will perform any one of the following activities. $-10 \, \text{HRS}$.
 - e. Identify the various printing tools and equipments and write their functions.
 - f. Tree plantation inside or outside of the institute campus.
 - g. Help in flood relief camp (by all students)
 - h. Other co- curricular and extracurricular activity.

EXAMINATION SCHEME (on Practical assessment)

Continuous internal assessment of 25 marks is to be carried out by the teachers.

Distribution of marks: -

Activities =10,

Group discussion = 5,

Field visits=5 and

Guest lecturer attendance and

Report=5.

1: Course Title: Industrial Management and Entrepreneurship (All Branches)

Course Code: Hu - 601

Semester: VI

Aim of the Course:

1. To acquaint the students with managerial activities

2. To provide introductory knowledge of Cost Accounting

3. To introduce students with industrial legislation

4. To explain the scope for self-employment

5. To compare and contrast different forms of business organization

6. To identify the opportunities to start a small scale industry

Course Outcomes:

On completion of the course on IME, students will be able to

 \triangleright CO₁ = explain managerial activities.

 \triangleright CO₂ = describe leadership qualities and decision making process.

 \triangleright CO₃ = state the elements of costs.

> CO₄ = explain important industrial laws.

 \triangleright CO ₅ = define different forms of business organisations

CO 6 = identify entrepreneurial abilities for self employment through small scale industries.

1. Course Title: BINDING & FINISHING

Course Code: Pt – 601
 Semester: 6th Semester

4. **Aim** : Getting the output through Print Finishing Processes are the most important operations for completing the print production. This will enable the students to make judgement about the aspect of Binding & Print Finishing, particularly the selection of a particular process chosen for a specific print production.

Objective: The students will be able to

- 1. Understand various Paper and Board sizes & Estimates, warehouse management & adhesive & other related materials, different finishing tools.
- 2. Appreciate styles of binding, layout of binding & finishing department.
- 3. Understand various types of binding, the detailed steps to be taken in each binding type.
- 4. Understand various cutting machines and other allied equipment.
- 5. Get an idea about various automation-taking places in binding & finishing.
- 6. Understand various Paper and Board sizes & Estimates, warehouse management & adhesive & other related materials, different finishing tools.
- 7. Appreciate styles of binding, layout of binding department.
- 8. Understand various types of binding, the detailed steps to be taken in each binding type.
- 9. Understand various cutting machines and other allied equipment.
- 10. Get an idea about various automation-taking places in binding.

Pre-Requisite: Elementary knowledge of Basic Printing & Pre-Press Repro Technique

Course Outcomes (CO's)	
CO-1	Understand book binding - its definition and classification, different papers used and its sizes, binding styles and uses of adhesives
CO-2	understand uses of cutting machine and binding and finishing tools.
CO-3	Understand various terms of binding, the detail steps to be taken in each binding and finishing.
CO-4	undrestand different steps in folding, assembly of folded material for binding
CO-5	understand proper binding by stitching, sewing, adhesive binding, case book binding etc.
CO-6	Understand operational sequences of binding, rebinding, preventation of deterioration

Programme Outcomes (I	O's)
PO-1	Apply the knowledge of mathematics and science to understand engineering fundamentals and to solve Printing Technology problems
PO-2	Design and conduct experiments of Printing Technology as well as analyse and interpret data.
PO-3	Identify, formulate and solve Printing Technology problems.
PO-4	Use the techniques, skills and modern engineering tools necessary for engineering practices.

PRINTING TECHNOLOGY (NEW SYLLABUS), 3rd to 6th SEMESTER

PO-5	Understand professional ethics and responsibility to extend the benefit of the Printing Technology projects to the society.
PO-6	Communicate effectively both verbally and in writing within the engineering community and with people in the society.
PO-7	Recognize the need for, and an ability to engage in life long learning to incorporate technological innovations.

5. Teaching Scheme (In Hrs):

Lecturer	Tutorial	Practical	Total

Binding & Finishing -Lab Code-Pt-601 (P)

Total Marks: - 50

Practical: -25
Sessional: -25
Pass Marks: -8
Pass Marks: -9

Skills to be developed -

- a) Intellectual skills
 - i. Knowledge of basic processes related to Binding & Finishing ii. Identify & selection of various tools, equipment & software.
- b) Machine skills -
 - i. Operate, control different machines & equipment
 - ii. Inspect/ produce the job for specified dimensions
 - iii. safety practices/ Care & maintenance of the tools & machines.

List of the practical

Unit: 1

- 1. Acquaintance with the tools and equipment and their uses
- 2. Performing operations like Counting, Jogging
- 3. Folding by hand
- 4. Acquaintance with the plan of Sewing machine
- 5. Sewing by hand
- 6. Wire Stitching

Unit: 2

- 7. Acquaintance with different styles of Binding
- 8. Preparing a quarter bound book cut flush
- 9. Demo on different kind of end papers
- 10. Case Binding
- 11. Document Binding

Unit: 3

- 12. Preparing a Writing Pad
- 13. Exercise on stitching and cutting machine
- 14. Demo on various Finishing operations such as Ruling, Numbering, Laminating

(dry

table top) -Miscellaneous operations such as Perforation, Eye-letting, Numbering.

15. Demo on Account Book Binding

Unit: 4

- 16. Demo on the Folding machine
- 17. Acquaintance with Die cutting, Scoring, Rotary board cutter.
- 18. Demo on Adhesive/Perfect binding
- 19. Demo on Saddle stitcher cum three knife trimmer complete Binding & Finishing m/c for magazine work

Reference Book

1. M P Kini Boook Binding for Students

2. Alen J. Vaugha Modern Book of Binding

1. Course Title :PRINTERS' COSTING & ESTIMATING

2. Course Code : Pt – 602
3. Semester : 6th Semester

4. **Aim**: Printing supervisors, owners of printing presses have to study costing for the purpose of cost recovery and cost control. The study of a scientific system of costing will give them proper guidance as to how the maximum utilization of the resources of the factory can be achieved and do away with waste of time and money. In an extremely competitive market, scientific estimating can guarantee the meaningful survival of a printing organization by enabling it to forecast correctly and judiciously the estimated cost of jobs, the overhead expenditure of a business, and the amount of profit to be made from each job.

Objective: The students will be able to

- 1. Understand various Paper and Board sizes & Estimates, warehouse management & adhesive & other related materials, different finishing tools.
- 2. Appreciate styles of binding, layout of binding & finishing department.
- 3. Understand various types of binding, the detailed steps to be taken in each binding type.
- 4. Understand various cutting machines and other allied equipment.
- 5. Get an idea about various automation-taking places in binding & finishing.

Pre-Requisite: Elementary knowledge of Basic Printing , Pre-Press Repro Technique & Binding Finishing

Course Outcomes (CO's)	
CO-1	Understand the structure of costing, variable cost, semi-variable cost, indirect cost, fixed cost.
CO-2	Understand definition of pricing, factors, bin card, job ticket, purchase requisition.
CO-3	Understand requisition and depriciation, definition and representation of Break- Even point
CO-4	Understand good estimation, good copy and bad copy, SPANKS method.
CO-5	Understand the use of En method, knowledge of estimation and determination of fixed cost of machine.

Programme Outcomes (F	PO's)
PO-1	Apply the knowledge of mathematics and science to understand engineering fundamentals and to solve Printing Technology problems
PO-2	Design and conduct experiments of Printing Technology as well as analyse and interpret data.
PO-3	Identify, formulate and solve Printing Technology problems.
PO-4	Use the techniques, skills and modern engineering tools necessary for engineering practices.
PO-5	Understand professional ethics and responsibility to extend the benefit of the Printing Technology projects to the society.
PO-6	Communicate effectively both verbally and in writing within the engineering community and with people in the society.
PO-7	Recognize the need for, and an ability to engage in life long learning to incorporate technological innovations.

1. Course Title: Plano graphic Printing Technique II

Course Code: Pt – 603
 Semester: 6th Semester

4. Aim : Among the wide spectrum of different printing processes the most versatile and popular process is Plano graphic process. A wide range of substrates can be printed by Plano graphic process. Continuous R and D are going on in this process into different printing machines manufacturing companies and allied trades. There are tremendous job opportunities for the printing students in this field. The rapid changes and development in the field of Plano graphic technology obviate certain very old methodology and claim inclusion of up to date concept. The present syllabus reflects this rationale.

Objective: The students will be able to

- 1) Understand the four units that make up any printing press.
- 2) Understanding the development of press design from platen presses to rotary presses.
- 3) Understanding the principle of offset printing
- 4) Understanding the feeding unit, registration unit, printing unit, inking unit, dampening unit and delivery unit operation of an offset lithographic press.
- 5) Understanding the basic steps in setting up and operating an offset lithographic press
- 6) Understanding the several quality control devices commonly used in offset printing.
- 7) Understanding the concept of offset blanket
- 8) Understanding the feeding, dampening and inking systems of offset presses.
- 9) Understanding the common press problems.
- 10) Understanding the different imposition schemes, precautionary measures in machine room.

Pre-Requisite: Elementary knowledge of Basic Printing & Pre-Press Repro Technique

Course Outcomes (CO's)						
CO-1	Unde	erstand the procedure to make a printing machine ready for other printing				
CO-2	Unde dama	erstand offset blanket and its usefulness, classification, qualities, repair of ages.				
CO-3	Understand sheet feeding and pile feeding and its different steps.					
CO-4	Unde	erstand inking system and setting of rollers.				
CO-5	Understand fundamentals of web offset press					
CO-6	Unde	erstand web theory, roll to roll, roll to fold, roll to sheet.				

Programme Outcomes (F	PO's)		
PO-1	Apply the knowledge of mathematics and science to understand engineering fundamentals and to solve Printing Technology problems		
PO-2	esign and conduct experiments of Printing Technology as well as analyse and terpret data.		
PO-3	Identify, formulate and solve Printing Technology problems.		
PO-4	Use the techniques, skills and modern engineering tools necessary for engineering practices.		

PO-5	Understand professional ethics and responsibility to extend the benefit of the Printing Technology projects to the society.
PO-6	Communicate effectively both verbally and in writing within the engineering community and with people in the society.
PO-7	Recognize the need for, and an ability to engage in life long learning to incorporate technological innovations.

1. Course Title: Printing Machine

Course Code: Pt – 604
 Semester: 6th Semester

4. **Aim**: In respect to the advancement of modern digital Printing Technology along with its analog counterpart, the Elective subject will groom the students more efficiently to face the challenges and to adapt the new technology.

Objective: The students will be able to

- 1. Understand the run ability factors.
- 2. Understand the delivery system.
- 3. Understand the different parameters of Flexography printing.
- 4. Understand the different parameters of Gravure printing.
- 5. Acquire knowledge about the importance of grippers.
- 6. Acquire knowledge about the trip throw mechanism.
- 7. Understand the use and importance of proper tools and equipment in offset.
- 8. Understand the detail concepts of offset printing.
- 9. Understand the detail concepts of different dampening systems.
- 10. Understand the printing unit including the adjustments of inking and dampening unit
- 11. Achieving proper ink and water balance
- 12. Understand the sequence of colours.
- 13. Understand Moisture content and dimensional stability of Paper Paper Conditioning
- 14. Understand various blanket related problem.
- 15. Understand printed image size changing print length.
- 16. Understand preparing different printing plates for storage.
- 17. Understand the printability of paper.

Pre-Requisite: Elementary Elementary knowledge of Basic Printing & Pre-Press Repro Technique

Course Outcomes (CO's)		
CO-1		erstand automatic feeder - successive and stream feeding, knowledge of ion, lifting and forwarding and delivery mechanism.
CO-2		erstand structure of flexography machine, fixing stereo, anilox roller, cell cture, cell angle, web path
CO-3		erstand roto gravure machine, splicer, web tension control, impression, slitter, er, web path
CO-4	Und	erstand gripper settings, general rules, precautions to be taken, ill effects.
CO-5	Und	erstand impression mechanism, cylinder parallelism, ill effects.
CO-6		erstand history of offset printing, printing units, its configuration, comparison veen single colour and multi colour offset machines.

Programme Outcomes (PO's)		
PO-1		y the knowledge of mathematics and science to understand engineering lamentals and to solve Printing Technology problems
PO-2		gn and conduct experiments of Printing Technology as well as analyse and rpret data.
PO-3	Iden	tify, formulate and solve Printing Technology problems.
PO-4		the techniques, skills and modern engineering tools necessary for engineering tices.

PRINTING TECHNOLOGY (NEW SYLLABUS), 3rd to 6th SEMESTER

PO-5	Understand professional ethics and responsibility to extend the benefit of the Printing Technology projects to the society.
PO-6	Communicate effectively both verbally and in writing within the engineering community and with people in the society.
PO-7	Recognize the need for, and an ability to engage in life long learning to incorporate technological innovations.

Machine Lab Code: Pt-604

Total Marks: - 50

Practical: - 25
Sessional: - 25
Pass Marks: - 8
Pass Marks: - 9

Skills to be developed –

- a) Intellectual skills
 - i. Knowledge of basic processes related to Machine
 - ii. Identify & selection of various tools, equipment & software.
- b) Machine skills -
 - i. Operate, control different machines & equipment
 - ii. Inspect/ produce the job for specified dimensions
 - iii. safety practices/ Care & maintenance of the tools & machines.

List of the Experiments

Unit: 1 Practice on Offset Printing Machine

- 1. Installation of Plate and Blanket
- 2. Setting of Feeder, Impression & Delivery according to the thickness and size of the stock.
- 3. Applying ink, damping solution make ready, printing with registration

Unit: 2 Practice on Flexography

- 1. Introduction and familiarization about Flexographic machine and other related elements.
- 2. Preparation of rubber plates.
- 3. Preparation of photo polymer plates.
- 4. Plate mounting in flexographic printing machine.
- 5. Make ready procedures and single, two and four colour printing in flexomachine.
- 6. Study of 6 colour and 8 colour flexography machine.
- 7. Printing on various substrates in flexographic printing.

Unit: 3 Practice on Screen Printing

- 1. To be acquainted with the fundamentals of Screen Printing Techniques.
- 2. To study the materials for screen printing
- 3. To prepare a screen
- 4. To prepare photographic stencil by direct method
- 5. To expose the direct coated screen in sunlight and to develop it with cold water
- 6. To be acquainted with transfer method or five star film method
- 7. To study screen printing ink and its qualities.

Reference Book

1. Course Title: Surfaces Preparation

Course Code: Pt – 605
 Semester: 6th Semester

4. **Aim** : In respect to the advancement of modern digital Printing Technology along with its analog counterpart, the Elective subject will groom the students more efficiently to face the challenges and to adapt the new technology.

Objective: The students will be able to

- * Appreciate the Surface Imaging concept.
- * Understand the Various Image Transfer Machineries for Litho-offset Plates.
- * Understand the Various Materials & Chemical used in surface developments.
- * Understand the Processing of various types of positive & negatives preparation through Image Setter.
- * Understand the Film processing technique on auto processor & Film assembly basics.
- * Understand the Various quality control measures on Surface Imaging.
- * Understand the Various trouble shooting on Surface Imaging.
- * Understand the Safety Measures and Health support.
- * Understand the Plant Layout for Surface Imaging unit/Department.
- * Understand Production responsibilities of related departments

Pre-Requisite: Elementary knowledge of Basic Printing & Pre-Press Repro Technique

Course Outcomes (CO's)	
CO-1	erstand the surface imaging concepts, materials in surface preparation, nicals used in surface imaging
CO-2	erstand film preparation through image setter, its calibration, conversion of ges, processing of positive and negatives, film processing.
CO-3	erstand imposition, film image assembly - aspects, materials required, aration of negative and positive film flats.
CO-4	erstand plate making processes, electrostatic process, laser exposed process, sion transfer process, reflex plate making, projection speed plate making.
CO-5	erstand modern techniques of screen printing, screen direct, indirect, direct- ect, capillary, exposing techniques
CO-6	erstand gravure cylinder making, raw cylinder, image transfer, electronic esses, proofing and correction, finishing.

Programme Outcomes (PC	O's)	
PO-1		ly the knowledge of mathematics and science to understand engineering damentals and to solve Printing Technology problems
PO-2		gn and conduct experiments of Printing Technology as well as analyse and rpret data.
PO-3	Ider	itify, formulate and solve Printing Technology problems.
PO-4		the techniques, skills and modern engineering tools necessary for engineering ctices.
PO-5		erstand professional ethics and responsibility to extend the benefit of the ting Technology projects to the society.
PO-6		municate effectively both verbally and in writing within the engineering munity and with people in the society.
PO-7		ognize the need for, and an ability to engage in life long learning to rporate technological innovations.

5. Teaching Scheme (In Hrs):

Lecturer	Tutorial	Practical	Total

Surface Preparation -LAB Code-Pt-605 (P)

Total Marks: - 50 Practical: - 25

Sessional :- 25

Pass Marks: - 8
Pass Marks: - 9

Skills to be developed –

a) Intellectual skills –

- i. Knowledge of basic processes related to Surface Preparation ii. Identify & selection of various tools, equipment & software.
- b) Machine skills -
 - i. Operate, control different machines & equipment
 - ii. Inspect/ produce the job for specified dimensions
 - iii. safety practices/ Care & maintenance of the tools & machines.

List of the practical

Unit: 1

- 1. Line Etching
 - 1.1 Metal Printing and burning in
 - 1.2 Make ready and retouching
 - 1.3 First etching and powdering
- 2. Finishing and Mounting for the production of Line Block

Unit: 2

- 1. Finishing and Mounting for the production of Line Block
- 2. Making Half-tone print on metal and Half-tone etching

Unit: 3

- 1. Finishing and Mounting for the production of Half-tone Block
- 2. Production of Combination Block (Line and Half-tone)

Unit: 4

- 1. Production of colour line block (two colour)
- 2. Preparation of key drawing and chart making
- 3. Photo polymer plate making by using Photo Polymer Process

Reference Book

- 1. Plate Making Department M.H.Bruno GATF
- 2. Flexography Premier I & II J.P. Crouch GATF

- 3. Ceramic Screen Printing Alburt Kosloft GATF
- 4. The Deep-etch Process Robert f. Reed GAFT

1. Course Title: Graphic Design

Course Code: Pt – 606
 Semester: 6th Semester

4. **Aim** : In respect to the advancement of modern digital Printing Technology along with its analog counterpart, the Elective s

Objective: The students will be able to

- 1. Understand the Digital Prepress & Printing Technology
- 2. Understand the Color Management
- 3. Understand the Font Management
- 4. Understand the Workflow Management

Pre-Requisite: Elementary knowledge of Basic Printing & Digital Pre-Press Technique

Course Outcomes (CO's)							
CO-1	Understand the configuration of a computer, the hardware, perepheral device different graphic software						
CO-2	proc	erstand the concept of phototypesetting, principles of phototypesetting and essing method, conversion from photomechanical to electromechanical & lly to digital method.					
CO-3		erstand the basics of different printing methods- laser , dot-matrix, ink-jet, nal, image setter. Their components and functions.					
CO-4	Understand scanner technology, type of scanner, processing methods, in processing, optical/magnetic character reader						
CO-5		erstand concept of image resolution, gray scale, colour resolution, pixels, device ution.					
CO-6		erstand image acquisation, scanning lines and resolutions, image size, editing es, unsharp mask.					

Programme Outcomes (F	PO's)	
PO-1		y the knowledge of mathematics and science to understand engineering amentals and to solve Printing Technology problems
PO-2	1	gn and conduct experiments of Printing Technology as well as analyse and pret data.
PO-3	Ident	ify, formulate and solve Printing Technology problems.
PO-4	Use t	he techniques, skills and modern engineering tools necessary for engineering ices.
PO-5		erstand professional ethics and responsibility to extend the benefit of the ing Technology projects to the society.
PO-6		municate effectively both verbally and in writing within the engineering munity and with people in the society.
PO-7		gnize the need for, and an ability to engage in life long learning to incorporate nological innovations.

5. Teaching Scheme (In Hrs):

Lecturer	Tutorial	Practical	Total
3		3	6

6. Examination scheme:

	Т	heory			Pra	ctical

70	10	20	30	33/100	25	25	17/50	150

7. Detailed course content:

Chapter	Chapter Title	Contents	Duration
No. 1	System Configuration	1.1 The Hardware we need – CD drive, Processor, RAM, ROM, HDD, FDD, Cache Memory, Expansion – Bays, Slots, Ports, SCSI, Monitor, Keyboard, Mouse, Track Balls, Touch Pads, Pressure sensitive Tablets and other peripheral devices. 1.2 The Soft ware we need – Operating system, Word processing, Software, Vector based, Illustration software, Pixel based graphics software, Page layout software, Font management utilities, System Maintenance Utilities.	(in Hrs)
2	Phototypesetting	2.1 Concept of cold composition, Generation/Original name/Output of character of photo-type setter, Principles of PTS and processing method. 2.2 Concept of Photomechanical to Electro mechanical and finally digital method.	6
3	Impact and Non- Impact printing output devices	3.1 Laser printing technology, Basic components of a laser printer, Function of a laser printer, Different aspects of laser printing resolution. 3.2 Daisy wheel printer, Dot-matrix printers, Method of printing and its resolution 3.3 Ink Jet Printer – Method of printing and its resolution 3.4 Thermal Printer, Dye-sublimation printers. 3.5 Image setter – types, parts, print mechanism and output, RIP technology	8
4	Scanner Technology	4.1 Introduction, Types of a scanner, product group. 4.2 Processing method, Limitations of a Scanner, Image Processing(Line Art, Continuous Art, Halftoning),Resolution, Optical Character Reader, Magnetic Ink Character Reader	6
5	Proper resolution and grayscale adjustments of digital images for print media.	5.1 Concept of Image Resolution – Line Art, Grey scale, Color Resolution, Pixels, Ipi, dpi, ppi, epi & their relation, Device resolution	6
6	Image Acquisition	6.1 Scanning Line & Halftone Image 6.2 Scanning Resolution- Input & Output 6.3 Dynamic Range	8

	6.4 Determining File Size6.5 Resampling Images6.6 Printing Separation approaches6.7 Unsharp Mask	
Class test	Three test of 1hrs.	3 hrs.

PROFESSIONAL PRACTICE –IV

6th SEMESTER, PRINTING TECHNOLOGY

CODE: PT-610

THEORY SCHEME: PRACTICAL SCHEME:

Theory: 1hr/week Practical assessment: 25 marks

Practical: 2hrs/week Practical test: 25 marks

Credit: 2

A) RATIONAL:-

To develop general confidence, ability to communicate and attitude, in addition to basic technological concepts through industrial visits, guest lectures on technical topics and conducting group discussions.

B) AIMS AND OBJECTIVES:-

The student will be able to:

- Preparing report on industrial visits, expert lectures.
- Interacting with peers to share thoughts.
- Prepare notes for given topic.
- Presentation in seminar, group discussion on improvement of communication skills.
- Acquire information from different sources.

C) PRE- REQUISITE:-

- 1. Desire to gain comparable knowledge and skills of various activities in various areas of importance.
 - 2. Eagerness to participate in group work and to share thoughts with group members.

Activities:

1. INDUSTRIAL/FIELD VISIT: -

10

HRS.

Structured field visits be arranged and report of the same should be submitted by the individual student, to form part of the team work.

Visits to following companies:

SCTE, ASSAM | NOVEMBER'2018

- g. TCPL 21st Century Packaging, near Chaygaon
- h. Huttamukhi Group (PPL) Packaging near Amingaon
- 2. GUEST LECTURES: (Any three) Lectures by professional /industrial expert/ student

Seminars on the following areas.

-10 HRS

- e) Printing Machine
- f) Printing Machine Maintenance

Individual report of the above lecture should be submitted by the students.

- 3. GROUP DISCUSSION: (Any TWO among a group of four to five students). Topic and time duration of the group discussion to be decided by concerned teacher.

 -10 HRS.
 - h. Offset Machines
 - i. Gravure Machines
 - j. Flexography Machines
- 4. STUDENTS ACTIVITY: The students in a group of 4 to 5 will perform any one of the following activities. -10 HRS.
 - i. Identify the various printing tools and equipments and write their functions.
 - j. Tree plantation inside or outside of the institute campus.
 - k. Help in flood relief camp (by all students)
 - 1. Other co- curricular and extracurricular activity.

EXAMINATION SCHEME (on Practical assessment)

Continuous internal assessment of 25 marks is to be carried out by the teachers.

Distribution of marks: -

Activities =10,

Group discussion = 5,

Field visits=5 and

Guest lecturer attendance and

Report=5.
